Nov. 15, 1996

Dear Miyuki and Homer :

Thank you for your letter dated on October 19. I am glad to know that you have recovered from your intestinal problem. I hope that you can prevent another attack of thrombi or emboli in heart, brain etc. I have some dizziness when I get up in the morning. Since head position makes dizziness, the labyrinth (internal ear) is not well functioning. However, I am working as usual and am OK.

I plan to go home on December 19 and to visit Amy and Tyra from

December 29 to January 6.
Yuka and I are scheduled to leave for Tokyo from LA on January 7.

You are looking for the European tour with Mari and Barbara. Our tour was nice and memorable except "poor hotel foods". You have to eat together in tour group at every supper.

I trust that you will enjoy the tour with your family.

I am enclosing tea (green & brown) and Yaki-Nori.

Best wishes, & Love,

Yo-
