

Dear Frank,

Sept 26, 1991

The young lady in photo, Kiyoko Mozaki, is a Sansei - Kibei - the first I've ever met. Her father and mom never spoke to her about the camps until the redress checks from ORA reached them in Japan.

She teaches English at a university in Kyoto, also a course on JAS. Her father, no doubt, was a member of the Noshi-dan as she mentioned "shaved head" at Tule Lake. When she said that he had been transferred to Bismark, North Dakota (last stop before Tokyo), I began to suspect that he's one of these ^{Frank's} "Native American Aliens". He either renounced or was compelled to renounce under duress. She said she'll get the facts and write me. I gave her Lion Report for edification of her parents, also for use in class on JAS.

She got her degree in Japan, then studied for a few years at Berkeley. Dr. Clifford knows her.

Am sending you E. Play material I got from FBI. Omura wants copies. Much love, Michi
