

Share-Cropping Offers Received

Approximately 20 offers of share-cropping for which 100 workers are needed have been secured by the outside employment section, Joe Carroll, chief of employment, announced today. Sugar beets is to be the main crop.

The contracts provide for adequate housing, pasture for dairy cows, garden and storage space, and feed for chickens and hogs for family subsistence.

The owner is responsible for all machine labor involved while the operator is to perform all hand labor. The owner takes out 1/5 of the beets and 1/2 of the beet tops for rent and the balance is divided equally between owner and the operator. This makes it a "50-50 deal" after the rent has been paid, Carroll said. The owner will also make available all extra labor needed such as haying and feeding at prevailing wages.

Interested residents are requested to call tomorrow, March 9, at employment office 21-26.
