VIII. MANAGER'S NOTES

As I was walking to the Administration Building on a business call, I overheard one of the lumber distributing

crew say to Bob Kitaji, "Don't give any lumber to the Blocks 207 and 208, because they got too big of pile of lumber on the truck when it was distributed to them last time." I, as the Block Manager, wanted to ask him what the big idea was, but hesitated because I felt that it would only end in argument, but I must say that if any block has good need of any lumber, it is only right that it should be distributed accordingly. This fellow who made the remark certainly was taking it on himself to make a remark such as the one he made when it was not any of his concern whatever.
