VIII. MANAGER'S NOTES

Many residents of this camp remark about the sudden change in the weather in Poston.

They are all wondering when the oil heaters are going to sent to the camps so they may have at least the comfort of a heater. But they realize that to wish for those stoves is useless, and so they would appreciate very much if the W. R. A. would issue clothing allowances so warmer garments may be purchased.

Blankets and better beds would be appreciated, too, if they cannot get heaters in place of them to keep good health and morale intact.

Respectfully submitted,

May T. Ketya
