Dear Miss Clark:

How are you and the patients?
I thank you for giving us permission
to look through the hospital.

My teacher is fine and the rest are
fine expect for one boy, named Hitoshi,
who is going to have his tonsils removed
today. We all hope that he will be back
soon. We thank the technician for showing us
the blood through the microscope. We also
saw the operating room. We saw the steriliz-
ing room and the instruments. We saw many
new kinds of instruments that we have
never seen before. We hope to visit the
hospital more often and learn more new things.

Sincerely yours,

Leland Hideo Inaba

Dear Miss Clark:

Thank you for letting the 5th grade go to the hospital. Thank you for treating my wound. It is better now, so I don't need to have a treatment any more. It was very interesting for us to see, now, what instruments you use and what they use for operating on the tonsils.

One boy, named Hitoshi is going to have his tonsils taken out. I did not see a microscope before and see the reddish-purple blood. The members of our class appreciated the things we saw.

Sincerely yours,

Leo Gata

Dear Miss. Clark,

Thank you so much for showing us the hospital.

It was nice of you to show in those instruments that you showed us.

The blood was a funny color. It was reddish-purple.

The Kicking pan was the first time I ever saw one. The suction machine was interesting, too. One of the boys in our room is going have his tonsils taken out.

We are going to have a picnic the twenty-third. I hope you could come with us. We hope to see the hospital more often.

Sincerely yours,
Nancy Kawashima
