

Original Group

Whooping Cough Group

Both Groups

The flag was inside the area at this time

" Goodies at the party "

Our second group of internees came from South America and there was a whooping cough epidemic among the children, so the entire group was isolated.

The Original group had planned a welcoming party for the children.

They still had their party, each group was in sight of each other, but still within their own boundary.

FEBRUARY - 1943
