

The ideals set up by the ^{majority} founders
of this democracy, are threatened
more at the present time than
ever before in the history of
the country. The ideal of this
country in which she struggled
so hard to achieve was equal
opportunity and freedom. This
nation whose aim is for the
freedom of the universe has
unfortunately to say have
not put much effort in practicing
their aim. We talk of Mexicans
as a social problem or of lowering
our standard of living. It is
little or no wonder that such
statement is true. From since the
annexation of Texas & California
little has been done by the
government to set up any form
of a bureau for the affairs
of these people and of the
other minority groups. We talk
of Pan American relation but

if we do not practice it at home
the South American government will
not recognize our sincerity.

In any case of any minority
group, the angles looked upon
them as inferior, especially in
the South against the Negro.

These people are denied from
some public places, little education
poor housing and cannot compete
in business, but yet when it
comes to fighting for their country
they come to the call without
any regrets.

In the West the evacuation
of the Japanese is a good example
of the practice of "fascism" under
an under name.

We must in order to become
a united nation recognize &
integrate the minority into our
national life with equal opportu-
nity for all groups.
