

Bob Oriba

The ideal sets up by the families of this democracy are threatened more at present than time than even before the history of the country because all young men are taking in the arm forces & the mother are working in the defense factories & they leave their children alone & then get into troubles.

Also the farmers are taken so we also have food shortages

Also the housing problems which face the country today because people crowd up in slum district where juvenile delinquency & crime start & where disease spread more rapidly. Young boys & girls start smoking & drinking

is another big problem. After
the war be this country is going
short on professional men, such
as of fa doctors, great mechanics
& etc. What are the fatherless
child & ^{wife} going to after the war?
