

George Okamoto
Prod 5 period

The Ideals set up by the founders of this Democracy are threatened more at the present time than ever before in the History of the Country. Now we have and had race prejudices which deprived citizen of their Liberty + freedom. As in the case of musics who are fighting to preserve Democracy for the People of this Country. But as I see it, some people realized that those boys fighting there it the front are not only fighting to protect Democracy but fighting to get rid of of the prejudice held against them because of their skin + Ancestors.

Not only the Japanese the minority group but also the Colored People. Even though the Emancipation Proclamation free them from Slavery and the 14th Amendment made them citizen and another one gave them the right to vote. but they also are fighting a greater thing, Race Prejudice. which deprives them from doing a great thing in building of Real Democratic nation. As I read in a book a Colored Soldier said "When I die, just put on the stone "Here lies a black man, who died fighting a yellow man to protect a white man". Maybe he died thinking that way but he also died in fighting a prejudice held against him because of his Color.
