2311—THE GREAT SAND DUNES,  
SAND DUNE NATIONAL MONUMENT,  
SAN LUIS VALLEY, COLORADO

These great mountains of sand, over a thousand feet high and 60 square miles in area lie at the eastern edge of the San Luis Valley at the base of the Sangre De Cristo Range. They claim to be the largest shifting sand dune tract in the world.

We've gone thru  
Calif. Arizona, and  
New Mexico - will  
soon be in Pennsylvania  
now in the Santa. This  
place is very hostile  
to us. - were told to  
be very careful. About  
300 miles from Phil.  
Borrow everything along -
