

DEAR GEORGE:

How's the weather out in California huh? Arkansas weathers are very funny. One day its hot as anything and next day RAIN. So far the weathers been okay. Hope California is good too.

Well, how are <sup>you</sup> feeling? Nice grades at school huh? English? Out here I have a teacher <sup>that</sup> some what resembles Mr. Dooley but, she talks too much. By the way heard from Dooley? I wrote one letter to him + then forgot him. I've got my report card long time ago + its Geometry B + Spanish C + Social Science B English B - Gym B That's all. How yours?

Well I'm sending you some thing thats a small token for what you gave me but hope you'll like it. Those things have been made by my sister

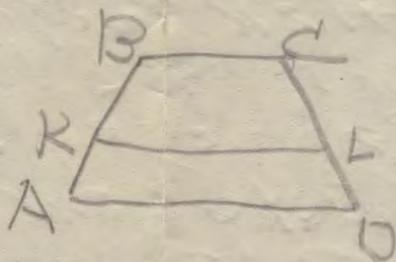

so you'll have to forgive me  
if it's not good. Those flowers  
are bent so you'll fix them huh?  
Well I'm running out of words  
so good bye.

Yours sincerely,  
Kenneth Horii

P.S. We're learning in Geometry  
about trapezoid.

Prove this Theorem

The median of a Trapezoid is  
 $\parallel$  to the base +  $\frac{1}{2}$  of their sum.

GIVEN Trapezoid ABCD  
Median KL

PROVE -  $KL \parallel BC$   
 $KL = \frac{1}{2}(AD + BC)$

Don't do it if you're busy.
