Dear Mrs. Perry

Hi Mrs. Perry! Here I am back in Armahe again and I guess you know what happened to me out in Denver.

Before I go any further I'd like to thank you very much for all the time and trouble we caused you during that time.

Gosh! I went to work in a Denver battery Mar 1 and I was intending on writing you soon thereafter but after working two weeks I ran into a little trouble with my chassis and landed in the hospital with a pretty bad case of pneumonia. I was in there for 32 days and got out about a week ago. I got back to Armahe Monday and guess I'll have to take it easy for awhile because the doctor advised me against work for some time.

I was very fortunate in getting penicillin because with only sulfa drugs they probably couldn't have saved me.

Yes! I heard that you were not feeling very well either and I do hope that it is not very serious and that you are improved by the time this reaches you.

How does the crop for this year look? I heard there was quite a blossom all around.

Mrs. Perry in regard to the washer and grader, we thought it would be best if we kept it but my granddads figures that we won't be doing any washing or grading of green fruit if and when we ever do return so we decided that we would like to sell the equipment.

If you do hear of anyone who is interested in such a deal, could you please let me know what the party has to offer.

There is no hurry and we would like to sell the washer and grader together.

Well, guess I'll be closing here Mrs. Perry and hoping to hear from you again whenever time permits. Best regards to Mr. Perry and all from everyone here.

Thanks again for everything.  
Very sincerely,  
L. J. St.
