## WILL JAPANESE EMIGRANTS CONQUER AMERICA?

### THE JAPANESE THREAT LOOMS OVER U.S.

We read daily of the wonders of Japan. A country which is an industrial giant with the second highest rate of exports in the world. While her economic expansion has passed up the rest of the world, it has been accomplished at the expense of the Japanese people. Here is a nation where there is almost never a strike and the majority of the workers are grossly underpaid by Western standards. Because of long hours of work and low pay, Japan is able to undercut the price on other nations' products.

One should not be lulled to sleep by false propaganda on the "paradise" which supposed-

ly exists in Japan. One must compare the living standard of the average Japanese to that of the average American. Japan is an island group about the size of Montana and four-fifths of it is uninhabitable mountains. Squeezed into the liveable space are 102 million people. (Half the population of America.) The world's largest city is Tokyo with 11.5 million people. This city is growing by 94,000 people each year. Tokyo is first in many things, world's worst housing shortage, worst sewer and water shortage, traffic jams, noise and smog worse than Los Angeles. Forty per cent of its housing are slums of one and two room units housing one-fourth of the city's families.

These are cold water flats with communal toilets and public baths nearby. Millions have given up hope of ever owning a home of their own. A tiny 600 square foot home on a 2,000 square foot lot costs \$60,000.

This housing averages only 40 square feet per person. A confidential poll recently revealed that Tokyo housewives complain that a major source of domestic friction stems from the fact that they must make love to their husbands in the same room with the rest of the family.

Astute observers representing the views of the people of Tokyo describe the world's largest city as "A living hell - a great octopus whose tentacles suck up everything within reach."

Thus, Americans should not be swept up with the reports of Tokyo's modern structures, bright lights and fancy eating establishments. The true measurement of a nation's greatness is in the standard of living it provides for its masses. Japan has failed in this as all the facts attest.

The question facing us is this: Are we going to allow cheap foreign imports to close down American factories and place our workers on welfare? President Nixon was correct in placing the 10 per cent tax on imports, but that will not be enough to stop the Japanese from flooding this nation with cheap products. Further controls are urgently needed to protect U.S. labor and industry.

More and more Japanese are emigrating to America. Along with other Asiatics they pose a threat to the continued control of America by the present Euro-

pean descended majority (when the Asiatics form a political alliance with the growing Mexican and Negroidal communities in America we will face a real crisis.)

### POLITICIANS WANT MORE ASIATICS

In a recent speech in Honolulu, Gov. John A. Burns called on the U. S. government to examine, "new ways to attract more Pacific and Asian peoples to our shores." He further added:

"America should be an open society that welcomes all visitors. By balancing the make-up of the racial groups we will improve the unique character of our nation that makes us the envy of the world."

Of course this is utter nonsense. America is great solely due to the mighty pioneering development effort on the part of the descendants of the European settlers of America.

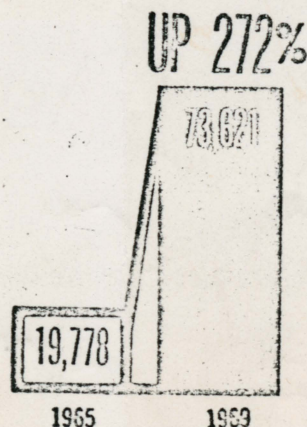

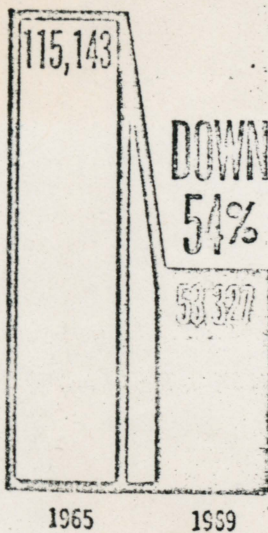

Gov. Burns of Hawaii was opposed in his views by labor leader Edward Tanguen who said in response, "We don't buy the argument that groups of people in the Pacific and Asian areas should be imported to maintain an ethnic balance. Overpopulation threatens our effort to gain a maximum quality life for all. It is ridiculous to risk sharing the poverty of these overseas people just to pride ourselves on an open-door policy."

Your editor certainly agrees with Mr. Tanguen, but the wealthy Robert R. Midkiff, president of the American Security Bank of Hawaii joined Gov. Burns in urging increased Asiatic immigration.

## Results of Kennedy Immigration Act of 1965

NORTHERN EUROPEAN &  
CANADIAN IMMIGRATION

ASIATIC IMMIGRATION

### JAPANESE CONTROL PERMANANT

American businessmen have a great fear for the aggressive Japanese. Once they control any business line, their tentacles close in an iron grasp which they never relax. The Japanese are the worlds largest producer of super-tankers which will soon dominate world shipping. Their automobiles are about to force Volkswagen into second place on the world export market. Their cameras, T. V. sets, typewriters, etc., have glutted the U. S. market and they admit to wanting to put U. S. producers out of business. You can purchase a Japanese T. V. set cheaper here than you can in Japan. Hundreds of textile mills have closed down, displacing thousands of American workers due to cheap Japanese imports. This only scratches the surface of our trade war with Japan. In every category where they substantially engage, they soon end up copying what we have produced, and build, export and sell them cheaper than we can.

### JAPANESE Foothold in THE U.S.A.

The reason Gov. John A. Burns (a Caucasian) is so strongly in favor of more Asiatic immigration is because he is controlled by the Japanese who supported him for governor of Hawaii. He has worked closely with the Japanese since aiding them in taking over the Democratic Party of Hawaii in 1954. They have been in complete control of the islands politics ever since.

Subsequently the Japanese have gained majority control of the state's legislature, hold its two U. S. House seats, and one U. S. Senator (the other is Chinese.)

Since the congress made the grave mistake of making the tiny islands of Hawaii into a state, the Japanese have emerged as a political force to be catered to by national politicians who now seek their support.

The racial make up of the Hawaiian islands is as follows: Japanese, 34.3 per cent; Hawaiian, 21.1; Caucasian 19; Chinese 6.2; Filipino 8.8; Negro and Other 10.6.

As writer Wallace Turner

# Japs Threaten Domination of U.S. Business

explains it: "Japanese influence is much greater than their numbers would suggest. There is a constant drive and desire for high achievement."

Everywhere on the island one finds the aggressive Japs running the business combines, holding most of the island's government offices, they are the doctors, lawyers and teachers. They have closed the unions they control to members exclusively of their own race. For example the Hawaiian Electricians Union is 100 per cent Japanese and no other racial group is granted a license. Unless Japanese immigration and business control is not halted, they are one day going to control America's minorities as they do in Hawaii and use this power to control the U. S. government.

### EUROPEAN STOCK MUST FIGHT FOR SURVIVAL

It is clear that America is under an invasion of hostile elements which seek the downfall of the European elements whose culture, labor and scientific know-how made this nation great. From the South of us comes the ever increasing flood of Latin Americans, led by 44,469 Mexicans who entered America during 1970. From the West Indies (islands in the Caribbean) came 61,403 Negroes — our largest single supplier of immigrants. Then the march from the East is led by 31,203 Filipinos and 17,956 Chinese. Compare this with the measly 29,000 Northern Europeans who came here in 1970 and one can easily see how the Kennedy immigration act of 1965 is rapidly changing the very complexion of America.

All of these elements are foreign to our American way of life. Not only that but are openly hostile and are daily becoming more violent in their actions to destroy our American way of life. The rising "Black Power" radical movements, the Mexican "Chicano" riots and the sinister Japanese and Chinese moves toward monopoly and exclusive control of all which is within their reach certainly should be ample warning. We, the descendants of the founders of America must soon cut

off the floodgates of this alien tide of unfriendly peoples or else we are simply going to be overwhelmed by their sheer force of numbers. Without delay we must let congress know how we stand on this growing internal threat to our "American way of life."

We must urge them to support House Bill — H. R. 165 which would allow a return to higher immigration quotas for Europeans. Then we need to demand

that the lid be placed on non-European immigration. We can give as reasons; great unemployment, high welfare rolls, present over-population and problems of violence between races of different color. All of these are valid reasons for the cessation of non-European immigration for the preservation of America as a perpetual haven for Europeans — creators of the greatest nation in the world, as destined by our forefathers.

## Philippine Immigration Booming

The population growth of the Asiatic nations is about to burst through the roof. It is shocking to report that some U. S. politicians want to bring their excess flow here to alleviate their crowded conditions.

The Philippines have one of the most rapidly mushrooming populations in the world. Their rate of growth is 3.5 per cent. "Medical World News" tells us that nothing is being done to curtail this rise. Poverty abounds as the growth rate has outstripped the Philippines annual economic growth rate. They are facing a population of 70 million by 1990, far too great a number for these small islands to hold.

President Marcos has urged in

Manila that immigration to the United States be encouraged among his people to help ease the problem. During 1970 the Philippines sent 31,203 emigrants to America. This is a far cry from the 2,500 a year that entered our land in the past. With the passage of the Kennedy Immigration Bill in 1965 this entire picture changed. The Kennedy bill favors vast immigration from South America and Asia, to a degree of almost excluding those from Northern Europe? In fact the immigration from the Philippines last year was higher than all the immigrants from all of the nations of Northern Europe combined.

### SOUTHEAST ASIA SATURATION

The Southeast Asian nations are comprised of Cambodia, Indonesia, Laos, Nepal, the Philippines, Thailand and South Vietnam. There are 280 million people residing here and this number will increase by 50 per cent over just the next 15 years. Experts tell us this will add 147 million people to this already over crowded area of the world.

The minister of Indonesia's welfare system, Dr. Kujai Idham said: "Demographically,

economically, socially and politically, the situation in Southeast Asia is one of the most critical in the world."

President Suharto has warned his people that unless the population explosion is checked, it will "by far outstrip economic development and will create national tension."

Unless something is done, this island country alone will have close to 300 million inhabitants by the year 2,000.

HOUSE BILL H.R. 165 would return European Immigration to past levels. Write your Congressman today!

# COMMUNIST CHINESE FLOODING AMERICA

## Separate Chinese Government

### CHINESE REFUSE TO ADOPT AMERICAN LIFE PATTERNS

Few Americans realize that life in the Chinatowns which are rapidly growing in our large cities is much different from what we are used to. The Chinese actually want independence from our society and seek to control their own separate government.

San Francisco's Chinatown is a good example. They have had their own autonomous ruling body for 100 years. It is called "The Six Companies." It is the government which controls Chinatown. Its rulers are made up of the Chinese power structure from the local neighborhoods.

"The Six Companies" administer justice through their own court which hears disputes. It provides care for illegal immigrants, administers justice and has representatives who maintain contact with the

city and state government. With the incoming flood of almost 40,000 Chinese over the past two years, this "Six Company" government's power has greatly expanded and may soon become the official ruler of San Francisco within a few years.

San Francisco Mayor Joseph Alioto has warned the White House that if something is not done to curtail Chinese immigrants streaming into this country, that his city is doomed to become one vast Chinatown when these aliens become the majority.

The Chinese population of San Francisco is now at 90,000 and growing at the present rate of 10,000 per year. While Blacks are taking over many of the great cities of the East, very few realize that Chinese are fast on their way toward the domination of San Francisco.

### RED CHINESE ELEMENTS AMONG EMIGRANTS

Few Americans realize that there are hundreds of thousands of communist Chinese living in Hong Kong. The communist party is the largest single party in that Island city. The Red forces on the mainland allow the British to maintain their control over Hong Kong because this represents an open door for communist trade with the rest of the world.

Therefore, as plane load after plane load of new immigrants arrive at San Francisco's International Airport, many are communist Chinese or pro-Mao in their thoughts. Many Chinese who are on neither side admire the great empire which the Red Chinese have erected out of the millions of dead Tibetians, Manchurians and Mongolians.

In San Francisco there exists a violent Chinese youth group called "The Red Guard." It is made up of the children of recent immigrants. Its head is Clifford Tom who has constructed a working alliance with the Black Panthers. He recently said in a speech:

"We are here to bail out the problems of Chinatown. We want to save it for the people instead of the rich pigs. We 'The Red Guard' want an end to the exploitation of the people in our community by the avaricious businessmen and politicians. We want an immediate end to the brutal harassment of our people by the racist pig structure."

One of the major complaints of arriving Chinese is that they discover America is not a land of milk and honey. As one observer put it: "Newcomers arrive and find conditions more crowded than in Hong Kong."

### CHINESE POPULATION EXPLOSION

The isolated island city of Hong Kong is jammed with 3.3 million people. This number is constantly swelling with a steady influx of refugees from Red China. From this city alone America received 22,000 Chinese immigrants in 1969 and almost 18,000 last year.

Singapore is another Chinese city outside the Bamboo-Curtain whose population has

Today's immigrant refuses to wash dishes or operate sewing machines. They are spoiled and want first class jobs, despite the fact that most of them cannot even speak or write English."

Recently the Red Guard rioted in San Francisco. The press played down the serious overtones of what the future holds but the bare facts are that 89 persons were injured, 35 arrested, a police car set afire and officers bombarded with cherry-bombs converted into nasty weapons by being dipped in glue and thumbtacks.

Our forefathers witnessed the incredible murder and violence perpetrated by Chinese in the Tong war days and prior upheavals by the war lords on the mainland. They realized that the Chinese are a people with the worlds fastest rate of reproduction and that they have a history of rule or ruin wherever they exist.

For that reason immigration quota laws were imposed by our wise forefathers limiting their influx to a token 105 per year. The Kennedy act of 1965 destroyed the protective laws designed to provide us with a peaceful, under-populated land where our descendants prosper and could grow. America was meant to be a national community of kindred people united to build a great civilization from which all the rest of the world would benefit. Now that racial strife threatens the peace and progress of America from all sides, we must hasten to move with all deliberate speed to solve this growing problem while there is still time. We must awaken the people Today, Tomorrow may be too late!

## PATRIOT'S ALERT!

Demand Congress repeal the Kennedy Immigration Act of 1965.

### Reasons:

- It cut off European Immigration
- Favors People Hostile to U.S.
- Creates Unemployment
- Swells the Welfare Rolls
- Source of Narcotic Smuggling
- Causes Internal Racial Strife
- Aids Growth of Communism in America

Send your Congressman's reply to A.I.C. for tabulation of those we must contact with more documentation to win them over to our side.

increased to 2.3 million people. This is a density of 9,100 people per square mile. Their stream of immigrants to American is also growing. With the present trend of normalization of relations with Red China we may one day be faced with her surplus populations knocking on our door.

China now is the most populous nation on earth, with over 740 million people.
