ALL IN A WORD

Shan't we use, hereafter, the words "resettle" and "resettlement" when we refer to persons leaving Manzanar to an inland city to accept job offers? In almost any other time and place "relocating to accept jobs" would be proper and not at all ambiguous. Here and now, however, the use of the latter word often leads to misunderstanding. What is worse, this word used in the sense of individual departures to take jobs in midwestern cities and farms, apparently leads to inspiring rumors of mass removal of residents out of Manzanar to some inland point, This has been denied in a dozen different ways, but apparently to no avail.

So with your permission—good people, patient evacuees we are in the midst of, as the WRA headquarters in Washington says, witnessing a resettlement program being inaugurated on a wholesale instead of retail basis.

Co-op Election

Manzanar residents are renewing their representation in the Co-op Congress.

Cooperation is the basic principle and keyword in any group endeavor. The intricate machinery of management, efficiently run, becomes simplified depending on the degree of cooperation from its members and the public at large.

The opportunity here of being a vital cog in the wheel of progress is open to everyone. The welfare of one is the wel-fare of all. Your congressman will be responsible to you, the people. He will keep you informed on all new developments in administrative functions of the Co-op. He is the receptor of complaints, acting as liaison between the people and the Board of Directors.

The Cooperative Congress has no political connotation. It represents the people in the consuming projects. The individual congressman attends the congressional meetings, receives copy of financial reports, hears decision of new policies. No less important is the congressman's responsibility in in-forming his people, through block meetings, of the happenings in Congress.

The familiar expression of frank disinterestedness, we hope, will wane as the importance of individual assistance and the benefits derived from the cooperative enterprises become increasingly familiar.

WASHINGTON, D.C., Feb. 17
—(By Cablegram)—The Associated Press reports that 7,425 men from among 25,000 Japanese-Americans in Hawaii between ages of 18 and 38 have signed up as volunteers. This represents 30 per cent of all eligibles.

Some Skeptical or Apathetic in Views Others Completely Approve of Policy

Sentiments expressed on the volunteering of the Japanese-Americans in the special combat unit of the Army were as diversified, as the number of residents questioned.

As expected, there were some voicing disapproval as well as some who were either apathetic, undecided or noncommittal of their opinions. Those who condemned the whole procedure usually based their arguments that treatment heretofore was unjustified and unwarranted and that there were no reasons to change their views. Some were purely skeptical and were merely awaiting the results of the new policy. Those who volunteered, naturally, had entire faith in the whole proceedings, both for their own benefits as well as benefits to dellow Japanese-Americans and others. Also in the opportunity to express their loyalty, in an active manner.

"Many, when given the opportunity in the last war, volunteered willingly to sacrifice their lives for the cause of this, their adopted country.
