

RESULTS OF BLOCK LEADERS' ELECTION RELEASED TODAY

The administration announced today results of Block Leaders' election after consultation with 36 leaders who had obtained complimentary votes.

The following will take office immediately: B-8, Chikaji Masuda; B-13, Gengi Yamaguchi; B-14, Kametaro Akiyama; B-15, Fred Muto; B-16, Sokichi Sugimoto; B-17, Joe Shikami; B-18, Henry Tsurutani; B-20, Hideo Uyebara; B-21, Henry Nakamura; B-22, Shigeru Kobayashi, and B-24, Thomas Ozamoto.

A spirit of complete cooperation prevailed between nominees of each block during the conference on selection, it was stated. In many instances, men who had obtained the largest vote declined in favor of a neighbor so that he might be permitted to continue other work within the community. In other instances, nominees wished to serve as alternates, rather than leaders, because of language difficulties and their inability to represent all groups.

In the case of Blk. 23, the nominees all stated that they felt more qualified individuals had not been given an opportunity to stand for election. A new election for Blk. 23 will be held next week. Announcements of the alternates will also be made at a later date.

CALL FOR CARPENTERS

An urgent call has been sent out for carpenters by Arthur H. Miller, director of employment.

ROY NASH'S FLASHES

In conformity with the desire of the Block Leaders, the Project Director has set the hours of labor on the camouflage net project at forty-four hours a week; eight hours a day for five days, and four hours on Saturday.

Mr. M.S. Eisenhower, Director of the War Relocation Authority, desires that there shall be complete freedom of religion in all War Relocation Areas. Hereafter those of the Buddhist faith may hold their services as freely as do Protestants and Catholics. Services may be conducted in the Japanese language.

CAMOUFLAGE NET WORKERS BEGIN WAR PRODUCTION

Four buildings on the south side of the center will be the scene of intense activity the ensuing months as garnishing of camouflage netting swung into full motion yesterday.

Over four hundred citizens of both sexes above the age of sixteen have been recruited and possibly another two hundred will be added within a few days.

Twenty persons who have been trained during the past week by the U.S. Engineering Dept. will help supervise the workers.

Since certain provisions of the Geneva Conference stipulate that enemy aliens cannot be conscripted for war industries, approximately one third of the available man power of the community has been frozen.

If this legal technicality can be surmounted, production would be accelerated because many of the residents have been fisher-folks and are familiar with the handling of nets.

If you have things in GOVERNMENT STORAGE

Center residents whose personal goods are stored in official Federal Reserve bank warehouses are urged to bring their receipts to the Information Office by Monday noon, if they want

their belongings shipped here at government expense. Unless the receipts are brought in by Monday noon, delay of from 60 to 90 days in delivery will result.

EDITORIAL

To earn a significant place in the nation's vast war program, Manzanar hoped that it could utilize every available man, but a kink has been thrown into the smooth functioning machinery when the garrisoning of camouflage nets began.

Due to certain provisions of the Geneva Conference, enemy aliens cannot be conscripted in war industries. Hence, only citizens have been recruited.

It is a sad realization to many of the issei to find that they are ineligible to do their share and prove their mettle in this crisis. They have lived here for years and desired to become American citizens, but a provision in the framework of the national government has prevented them from doing so. Many of them are aliens in name only, and by their past actions have proven themselves far better citizens than those born here. They have shown unquestioned loyalty and their affirmation of the democratic way of life has been sincere.

We hope that this legal technicality can be surmounted because we do not think the conscription of non-citizens who are loyal and faithful to the land of their adoption would in any way violate the spirit of the Geneva Conference.

It would be a great morale builder in this community and an antidote to counteract disruptive influence and whisper campaigns.

ORGANIZATION OF TOWN MEETING MEETS APPROVAL

Town Meeting--America's traditional democratic institution for free and open discussions of community and national problems will soon replace back fence free-for-alls.

Manzanar's lusty voiced Town Crier is in search of a sponsor. Enthusiasm for town hall meetings, however, is spreading through the center and organizational work is under way.

Several block leaders have already expressed their approval:

"There is an urgent need to forget our petty differences and as a group to identify ourselves with America's war effort," stated Karl Yoneda, B-4.

"An open forum would be a healthy outlet for our mental energies. Nisei will be better able to adjust themselves to the outside world if they keep up with current trends in labor and national affairs," declared Tom Yamazaki, B-11 leader.
