POSTON AWALYST PUBLISHES BOOK

Time magazine of June reviews the new book, The Governing of Men, which is the story of Foston relocation center, by Lieut. Commander · Alexander H. Leighton, Navy Medical Corps psychiatrist who was social analyst at Poston for 15 months.

Time says the book suggests "a key to be tter understanding" of the uprooted Jaranese, so"puz zling" to average American citizens. It lies in remembering that "U.S. Japanese are human being."

From the book Time explains that the Poston striko was caused less by the war than by dis sension among evacuees -- Issei. Nisei and Kibei, as groups with conflicting attitudes and confused loyalties--discomforts e nd confinement of center life, and misunderstand ing between evacuous and the camp's "overworked administrative staff, (which) had been thrown togeth er as hastily as the buildings."

Review concludes: 'Canmander Leighton, objective throughout, reaches no conclusions on this U.S. experiment in governing another race behind stockades. But his attitudes is aptly expressed in the quotation from which he got his title: 'Oh, it wore better to be a poor fisherman than to meddle with the governing of men."

INDEPENDENCE DAY

July Fourth is being observed ouietly here this r, but it is a Fourth that is no less significant year, but it is a Fourth that is no less significant than the others, Both for the nation, which is sacrificing so that all people can be free, and for Japanese Americans, who are sacrificing for the nation and for the freedom of its race, this Fourth of July is as

momentous as any.
AGAINST TYRANNY

Independence and freedom mean more to us now than ever did before. Having been confined for three years, having been deprived of many of the privileges which we thought were ours by right, we now know that our let is going to be an uphill fight that will continue long after the nation's present struggle is over. It will be a fight within ourselves to keep faith in a country which sometimes errs in its treatment of minorities. It means a fight outwardly against the narrow minded who feel that Americanism is a matter of the skin.

FOR A HOPE

It will be sweat and tears for a group that sufferfrom sudden dislocation and will suffer again from ed relocation and readjustment. It seems wrong that an innocent group has to suffer twice, once to be to rn from homes and again to be sent out to shift for themselves. But looking at it realistically, Japanese Americans who want to make this country their home can see no other way out than to receive as much aid as the government will provide and start out once again where they left off. Our feelings of what we think we deservo will have to be subordinated to what the government thinks is what we should get. It means keeping down our feeling of bitterness and fighting on -- a continuing struggle for independence. And for all that we eventually hope to be given unqualified members hip in a country where all men "are endowed with certain inalionable rights, that among those are life, liberty, and the pursuit of happiness."
