SALUTING ALL THE KITCHEN WORKERS

Food, clothing and shelter are the three physical necessities of life. Of the tric, food is the most important for "an empty sack," as Benjamin Franklin has aptly pointed out, "cannot stand."

Food served in this Project's mess halls, like in all other Relocation Centers, cannot be said to be "luxurious," but; nevertheless, it meets the tested taste requirements of the Center residents.

In re food, Dr. Thomas Parran, surgeon general of the U.S. Public Health service, said:

MNone of the food shortages we have experienced so far have been detrimental to health; some of them have even been helpful to people who liked to eat too many sweets, too much fat, or just too much food.

"Thatever additional foods may be rationed during the coming year, there is every prospect that we shall be able to get the calories that we need for body fuel, and the protein, vitamin and mineral totals that we need.

"It is simply a matter-of choosing wisely from what is available, and cooking it properly."

The procurement, mess manage-

ment and motor pool units of the supply section of the administrative division of this Project. have cooperated well in the matter of "choosing wisely from what is available, and cooking it properly."

The mess management unit is confronted with the following 'tasks:

1. Serving 19,872 meals per day to 6,624 residents (Center's population as of January 26, 1944), exclusive of the many servicemen visiting here day in and, day out from all points of the compass.

2. Observing the WRA regulations limiting the cost of meals to 45g per day per person, 14g the . 45g per diem ration to be made up by the Project's production of vegetables, hogs and other food for local consumption in the various mess halls.

3. Conforming religiously to rationing restrictions placed on the non-Center public.

4. Securing a belanced diet for a population ranging from pro-natal to post-natal mothers, patients to pre-mortem people, from infants to the infirmed aged and other categories.

5. Keeping within the Center's budget requirements.

C. Preparing the Center-wide menus in comprehensible simple names, instead of resorting to fancy names like vermicelli soup, soup a la jardiniere, soup a la julienne, consomme of peas, fried fillet of mackerel, soand-so dish a la crecle or New England style, thousand-island sauce or fruit cocktail.

Waldorf -Astorian names of and dishes are missing from the memas but the food is appetizing, thanks to the chief stewards, oocks and the members of the kitchen staff.

It is a credit to them that since the inception of this Center they have not half-cooked, over-cooked or mis-cooked rice, nor mis-baked pies and doughnuts, nor miscued in making puddings

THEY SAY -

PRES IDENT ROOSEVELD If ever there was a time to subordinate individual or group selfishness to the national good, that time is now.

Disunity at home -bickerings, selfseeking partisanship stoppages of work, inflation, business as usual, politios as usual, luxury as usual -- those are the influences which can undermine the morals of the brave men ready to die at the front for us here.

PUBLIC SYRUS: Vice is the most dangerous, when it puts on the garb of virtue.

ANCNYMOUS: When one becomes "fed up" or tired of his or her work--that is, when the saturation point is.reached -- it is only human for "Thine work is easier than mine."

It is human nature for he or she to feel that his cr herwork-cutdoors or indoors -is tougher than that of others.

This Center, however, is fortunate in that all residentswhether engaged in skilled professions, unskilled, manual or mechanical laborpossess the feeling of. "Thine work is harder than mine."

Mr, Jose M. Garay Consul Spanish Consulate .

New Orleans, La.

Last December 13, occasion of on the his visit to this Center Mr. Alfonso Sabadie conducted a public meeting attended by Japanese nationals of this Center. I served as chairman at thatmeet-

At that meeting Mr. Sabadie requested that we send him three lists:

1. Repatriates who already had made such application.

2. These who had canceled requests for repatriation or expatriation, and

3. Those whoshould request repatriation after that date.

Nothing was done toward securing those lists for a few weeks, primarily because we had no organization or other mechanical means of obtaining such information.

Early in January however, I received your letter concerning an individual request in which you indicated that the lists Mr. Sabadie had requested would be valuable.

I read this letter to the Blook Managers at a meeting. A week later members of the Community Council collected the lists compiled by their respective Block Managers, bringing them to me.

From this material we were able to compile two lists:

1. Those persons who have requested repatriation or expatriation, and

2. Those persons who have canceled requests for repatriation or expatriation

I thinkit is proper that I do not send these

Denson, Arkansas lists to you, for two ... January 27, 1944 reasons. They are not complete or acourate and are not the exact lists requested.

> The second reason is that I am advised by the administration this Center that of it is not proper for an individual or a government agency to supply lists directly to any consulate.

Diplomatic practices, it has been explained to me, require that suchlists be exchanged only by State Departments.

I am sending a copy of this letter to Mr. Dillon S. Myer, Director of the War Relocation Authority, and am releasing a state-ment to the Center ment to newspaper.

The latter will repeat the oftenpublished statement that each individual resident should properly make sure of his own re- sent to you would do patriation status.

It will advise each individual to see to it that his
