ALL-NISEI COMBAT TROOP TO FIGHT AS PART OF U.S. ARMY

Nisei may now have the chance to fight for the United States.

An all-nisei combat team will be recruited by the U.S. Army for active service in a theatre of war.

This announcement was released yesterday morning by Secretary of War Henry L. Stimson at a press conference in his office.

SPECIAL UNIT OF ARMY

As head of the War department, Stimson said that plans have been completed for the admission of a substantial number of American citizens of Japanese ancestry to the Army of the United States.

This action was taken, it was said, following study by the War department of many earnest requests by loyal American citizens of Japanese extraction for the organization of a special unit of the Army in which they could have their share in the fight against the national enemies.

RIGHT TO BEAR ARMS

The following statement was issued by the Hon. Henry L. Stimson:

"It is the inherent right of every faithful citizen regardless of ancestry to bear arms in the national defense. When obstacles to a free expression of that right are imposed by emergency considerations, those barriers should be removed as soon as humanly possible.

"Loyalty to country is a voice that must be heard, and I am glad that I am now able to give active proof that this basic American belief is not a casualty of this war."

BY VOLUNTARY INDUCTION

The War department announced that the initial procedure in the formation of this unit authorized by the Secretary will be voluntary induction. Facilities for this will be nation-wide including the Hawaiian Islands and the WRA centers in this country.

No individual will be

inducted if doubt exists as to his loyalty. Upon induction the nisei will begin training as a combat team for service in an active theatre.

HARD HITTING UNIT

This combat team will include the customary elements of infantry, artillery, engineers and medical personnel. No effort will be spared in developing it into an efficient well-rounded hard hitting unit.

The new unit will be trained separately from the battalion of Americans of Japanese extraction, originally a Hawaiian National Guard organization, which is already a component part of the Army.

PART OF LARGE PROGRAM

The War department action, it was announced, is part of a larger program which will enable all American citizens of Japanese ancestry to make their proper contribution towards

winning the war through employment and war production as well as military service.

Immediately with the release of this announcement, Dillon S. Myer, WRA chief, teletyped his message to the Center.

MOST SIGNIFICANT DATE

"This announcement makes Jan. 28, 1943, the most significant date of the last ten months for persons of Japanese ancestry in the United States," Myer said.

Myer also mentioned the many letters he has received from nisei wishing to participate to the fullest degree in the war.

Center leaders observed that this move by the U.S. Army will do much to ease the resettlement problems of the evacuees in outside communities since this is the first positive proof that the U.S. Government believes in the loyalty of the nisei.

Statement by Dillon S. Myer

I find deep satisfaction in the announcement today by Secretary of War Henry L. Stimson that a combat team composed of American citizens of Japanese ancestry is to be recruited by the United States army for active service in a theatre of war.

This announcement makes January 28, 1943, the most significant date of the last ten months for persons of Japanese ancestry in the United States.

Many have told me, in conversations and letters, of their desire for active service in the armed forces of this country. For many months I have been looking forward with them to the time when their desire might be realized.

All facilities of the War Relocation authority, both at the relocation centers and in Washington, will immediately be placed at the disposal of the War department to speed the formation of the combat team announced by Mr. Stimson.

Dillon S. Myer, WRA

Cold, White Stuff Is New to Many

The kids in Denson are still talking of the fun they had Tuesday when they woke up to find themselves living in a country buried in a mass of white.

Not only the youngsters, but grown-ups, too, found the picturesque scene something which they had never seen back in California.

But most excited of all were the people from Hawaii who, accustomed only to the tropical sunshine and year-

round warm weather, experienced for the first time the thrill of snow-covered ground.

The heavy sleet which took place Monday night followed Sunday's temperature of 78 degrees.

By yesterday, the sun had started to melt the ice, leaving the residents to walk in the slush—the inevitable end to an otherwise priceless and enjoyable experience. —AEN
