ZA ZEN TRAINING
(SELF CONTEMPLATION)
IS ON SEPT. 21-26

All young Buddhists of Poston I are requested to register for Za Zen training immediately, to be held between Sept. 21 and 26, from 5 to 6 a.m. at Blk. 45-14B.

Za Zen (self contemplation) training is "for yourself and others in enlightening a better and happier daily living," according to the Buddhist teachings.

The writer has made a somewhat bold remark in this column last Wednesday in respect to issei's ability in both business and farming undertakings and said that they have been the producing factors until they came here for the duration. Actually, our older farmers have made the entire State of California productive and kept it green all year around.

The set-up of farming project here, we learned, is after a very good pattern--rather an ideal one. However, it lacks encouragement. Co-operative system applied to it is quite a new one, and no farmer can swallow it especially when they get paid in the lowest bracket of monthly allowances of measly twelve dollars. The farmers should be placed above all others in regard to the amount of allowances. The wages or allowances should be so made according to the degree of importance the job implies.

Enough of this. But here is a tentative plan which if approved, might eliminate unpleasantness and dissatisfaction now prevailing among our farm hands and give them something to look forward and at the same time, speed up the production.

Here it is.

1. The farming project in Poston should be turned over to and under the direct supervision of the Federal Department of Agriculture to facilitate the general marketing and distribution of products.
2. Leasing of tract of land to any farmer for the period of five years on share crop basis. The Government, in leasing the tract of land on share proposition, agrees to furnish and loan all the necessary farming implements, if asked and also furnish seeds, fertilizer and insecticide, free of charge.
3. The Government reserves the right to choose the kind of crops wanted.
4. All the farm hands hired by the individual farmers should be paid once a month by the Government. Said allowance or wages should be the highest available for enlistee or worker in the Center.
5. That the Government, as a trustees, handle all the products keep the account of market quotations from time to time on all shipments, chages and other items and make a yearly report and pay the balance in cash to individual farmers for their dues. The amount of wages payable

to farm hands should be first considered by representatives of both farmers and laborers.

6. The farmers must use the best in their ability to do effective work and clear, at least one-fourth of their leasehold every consecutive year.

7. The status of issei now being classified as enemy aliens, under the law, may not be able to enter into any contractual relationship with the U.S. Government. If so, the leasing should be made in the name of nisei, although the actual undertaking in farming may be carried on by older non-citizen Japanese. K.T.

Feminine Touch

Via Catalogue

In Poston, the pleasure of shopping in the busy streets of metropolis or small towns is now only a fond memory to us. It seems that catalogue is one of the few sources in which we may obtain ready made dress and materials. Paging the new fall and winter catalogues, the flag red dresses, suits and coats catches our eyes. This color, as stated before would add great colors to girls wardrobe as well as to this dull colorless environment. The styles are simple and more slimly cut to fit the gov't. regulations.

Beige is ever a popular color. First few pages are set aside for perfectly coordinated color combination wardrobe. Among them is a flag red coat with beige and green sport dresses, red corduroy suit, red hat and bag and brown shoes--which seems to be a colorful wardrobe for Poston.

Spun rayons lead the fabric list. But with the financial system and climate as it is here, the lower priced cotton of prints, tweeds, sport flannels, with lovely print and plaids are also abundant.

SHORT HAIRCUT TO BEAUTY

Short haircuts are sweeping the nation like a whirlwind. This year the short haircut is not a one woman fad, but an established fashion. It is easily managed in daily care and knows no age limit. Very long hair sometimes tends to drag down a face, aging it, while shorter cut tends to lift facial contours and give a youthful appearance. There are questions on how much to cut, which length will be most becoming, and whether a permanent is needed. This is where experienced advice is so important. They advise on textures for each permanent, analyze facial lines, contours, necklines in helping you decide which length your tresses will, or won't go, in your "short haircut to beauty."--by G. Ohashi

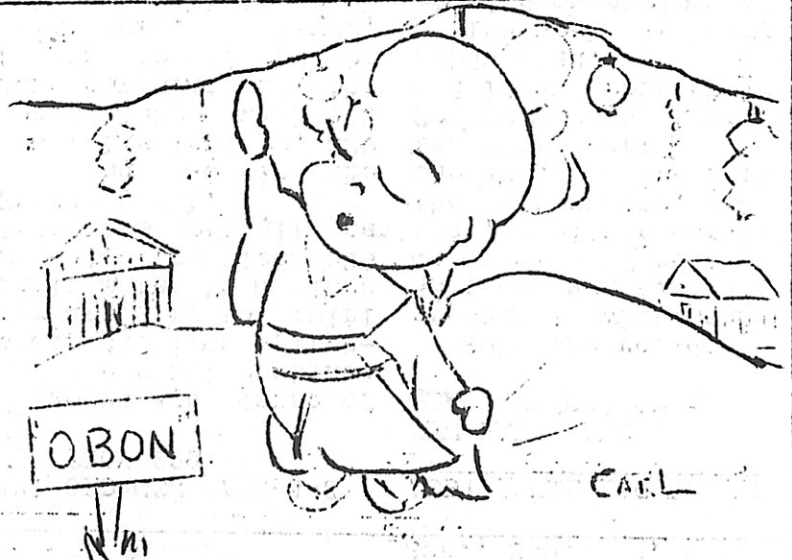

- VERSION OF US -

Women--the so called "weaker" sex--as talked about as the weather--have been the object of much ridicule, as well as of much praise. The better half of mankind has been accused of being lovers of gossip, back biting, foolish frivolities, and of wealth--money, to be specific. Her charms are manifold. The art of provocative glances, ascending eyebrows, swaying hips, and of temptingly soft hair have been, and are being studied thoroughly. Women dress to please the men; her vanity has been the cause of her downfall. The colorful plumage of her changing fashions, the intriguing hair styles, are all for the purpose of accomplishing the one thing.

Yes, we have our faults--but the men also have their share of imperfections.
