DEWITT ISSUES NEW ORDER TO EXAMINE INCOMING PACKAGES

THE BATTLE AGAINST INFLATION

Nations at war discover that they are fighting not only on the battlefields, but also at home. The battle of armies depends upon the battle of production. And the battle of production depends upon waging a successful battle against inflation.

Money by itself, of course, has no value; its value consists only in what it can buy. In wartime money tends to lose in purchasing power because more money is in circulation as a result of vast government spending. If it were possible to increase the supply of civilian goods to keep up with the growing supply of money, inflation could be prevented.

The purchase of war bonds is one method of taking money out of circulation. Increased taxes provide another way. The limiting credit through restrictions on charge accounts and installment buying is another.

Still the cost of living has gone up. From January to May it increased fifteen percent, and it is still rising.

The largest item in most family budgets is for food. So long as farm prices are allowed to rise beyond parity, workers will demand increased wages to meet their rising cost.

The battle against

**MORTUARY ISSUE
 SETTLED IN PRESS
 EDITORIAL, LETTERS**

The Poston Mortuary and crematorium which has been a subject of conversation for the past ten days, today was being dismantled from its former sight of Poston General Hospital and preparations are being made to build at the warehouse area.

Sunday editorial in the Press Bulletin resulted in quick action on the part of the Community Council and by a unanimous vote in a resolution calling for the removal of the crematorium was presented to the Project Director.

The Press Bulletin wishes to thank the many residents who sent in letters endorsing in the editorial.

DEAR READER: With the issuance of the special Poston County Fair edition by the Press Bulletin, next week, we are stepping into a new era in the venacular business. We consider it a new era, because this number will represent the work of the Staff, which has been working day and night, compiling Dept. news; statistics; and County Fair items, to be published in the Special Issue.

Some of us have been new to the newspaper trade. However, the motive behind the Staff was to "do the best" with whatever handicaps there was to be met. Now we have been tested and feel proud of the accomplishment! --HM

Guest Editorial

OTHER SIDE OF THE PICTURE

Mr. K.T.

In his recent editorial, he tried to convey to his reader about the Athletic Division of Rec. Dept. being over crowded. He also tried to stress the fact that these athletic energy should be used in Agriculture. The over-all project of 3 Units. The importance in Agriculture to the community is very vital but I consider the over-all project now is Recreation. Whether these recreation be tried through Art, Music, Drama, Wood-carving, and club workers of the Athletic Div., and the past troubles in the minds of our citizens must be adjusted and begin a new life. Unless the various dept. and Rec. do not achieve their ends I assure you the Agriculture or any other project will greatly be curtailed. The Athletic Div. of the Rec. Dept. has tried to do its part in adjustment of the community by providing a program for the majority in the least possible time. We have become confronted with the problems of lack of machinery, lack of equipment.

We admit, we made mistakes, but you must realize that we are also adjusting ourselves to the work before us. If we have failed to do a better job you must excuse us, we have had no education along this work, but you will not and cannot take away our sincerity and any effort and our aim to carry out this program.

Mr. K.T., as you say that our dept. is over-crowded and you have better ideas for our dept. I assure you, we will welcome your advisorship for a better organized association.

RUMOR OF COUNTY FAIR POSTPONEMENT DENIED IN LATEST REPORT

BOWER'S PLEA OVERRULED BY PEOPLE

ADDITIONAL SPORTS

Albert Kaniye, Works Director for the Fair reported late last night reassured the people of this Community, that the Fair will definitely be held Oct. 17 and 18.

To spike the many unwanted rumors that 'the Fair has again been postponed,' Mr. Kaniye said, "Somehow we don't blame them for thinking that way for we were quite indefinite ourselves, but I can assure the people now that the 'green light' for the much-publicized and much-awaited Fair has been flashed, and we are all ready to give the people a treat of their lifetime."

Reportedly to be the first Fair ever to be held in the Yuma County, the gigantic event is to take place at the Poston Auditorium, located on the southeast end of Unit One.

As a result of an editorial in the Oct. 4 issue of the Press Bulletin protesting against the building of a crematorium immediately adjacent to the hospital and the discussion of the question at the Oct. 7 Council meeting, it was approved by W. Wade Head, Project Director, that the work on the building in its present site be stopped and a more favorable location chosen.

The resolution presented before the council setting for various reasons, psychological and moral, for the objection of the Issei, was answered by Ray Bower, Funeral Director.

Mr. Bower contented that the present "objected" site was selected on the basis of economic and sanitary reasons.

However the people overruled his plans on the grounds that the main objection was the sentimental and psychological reason; that the morale of the Community would be much affected by offending the people's sensitivity.

PERSONAL TOUR TO MINIATURE PARK BY AN OUTDOOR REPORTER

Approaching Blk. 19 from the north on an excursion to the miniature Park, the first thing that caught my eyes was a colorful friendly sign, "WELCOME TO BLK 19".

From the mainland I could see the miniature ocean, and in the calm waters I saw a fish swim into the shadow of a light house perched on a rocky mass. Beyond the freshly painted bridge that connects the island to the mainland, I can see a house on a pier and next to the pier, a rowboat. A radio station stands on a high hill overlooking the sea and a fishing boat can be seen near the shore of the second island.

Moving on, I saw an entirely different scene, from a beautiful ocean view to a picturesque desert of various shape tree stumps and cactus on a circular mound. From the desert I wondered to the fish ponds; one of heart shape with an arrow, the other the shape of a figure 8. A much larger fish pond was being constructed by the Blk. gardeners and residents, it was learned.
