**MANUFACTURING OF RAZOR
CUT SHARP IN LATEST
WASHINGTON WAR ORDER**

Male residents of Poston who have been shaving regularly in the past will have to ease up on the shaving in the future or will have to be contended by getting "soup" on their whiskers, as, according to the AP release in the recent Los Angeles Times, the manufacture of safety razors have been cut and all razors and blades here have been placed under strict restriction on Nov. 5, by the War Production Board in Washington, D.C.

The manufacturers of razors, since the restriction, may now produce safety razors only for (1) the fighting force, (2) export and (3) lease-lend purposes. The manufacture of straight razors were out sharply for Nov. and Dec. and will be halted entirely Jan. 1.

The WPB assures the men folks that there will be "blades for everybody" in the civilian life in 1943 as millions of the men will be in the service and the production of the blades will be increased 12 percent over '40. The WPB advise all men to "look around" for some way of preserving the old blades until they are able to secure a supply of new blades.
