

EASTERNERS FOUND TO BE FRIENDLY TOWARD EVACUEES

Giles L. Zimmerman, Chief of Employment, who returned last Sunday, after a month's trip to the East and Mid-West on official business sounded public opinion while on the trip and discovered that most people were either friendly toward the evacuees or blissfully ignorant of their existence.

Compared to the newspapers in the Western Defense Command, the press in other sections of the country devoted little attention to the Japanese-Americans, Zimmerman noted. But when Eastern and Midwestern newspapers did run a story, it was generally favorable.

The Dies sub-committee investigations which Los Angeles and Phoenix papers played up hardly caused a ripple farther east. "The Townsend testimony, for example, rated about five inches on the third page in the St. Louis Post-Dispatch, while the same story was being featured with banner headlines by some Western papers," Zimmerman declared.

According to Zimmerman, Washington officials of WRA now feel that the period hesitancy about public opinion is over. When the relocation program passed calmly through the turmoil caused by the execution of Doolittle's flyers, WRA was convinced that had been overly apprehensive about public sentiment, that it had been too cautious.

VOL. XIII NO. 13

DIRECTOR WADE HEAD TO REMAIN HERE

On returning from Washington, D.C., where W. Wade Head, Project Director, attended the project directors' conference recently, Mr. Head stated that he will remain on the project as Director of Poston Center as long as possible, and until he is called to duty in the armed forces.

Recently a petition

was signed by the residents of Poston requesting the director to remain on the project when the evacuees learned that Mr. Head was to be transferred to another position.

Mr. Head wishes to express his sincere appreciation for the confidence the residence has shown him.

MALARIA CARRIERS FOUND HERE

In an investigation of the sanitary conditions of Poston made by Drs. W. Hammon and W.C. Reeves of the Hooper Foundation, an Institute of Infantile Paralysis Research in San Francisco, the doctors informed the Public Health Dept. that a certain species of mosquito, called "Anopheles Pseudopunctipennis," an agent which transmits malaria to human beings were found in Poston, according to the Health Dept.

Since it was learned that this species of mosquito inhabited here, drastic measures are being taken by the Health Dept. to rid the insects in and around the camp to secure and promote the health of the residents.

It is known that it is very difficult to detect the carrier of malaria and since the residents are exposed

CONDENSED MILK NOW RATIONED

In the OPA ration chart #3, effective June 6, condensed milk is now included in the 16 points for meat rationing, according to C.E. Snelson, Chief Steward.

All food coming to Poston and consumed by evacuees are based on the following table: lard, shortening, salad and cooking oils, and margarine are five points per pound; evaporated and condensed milk is 1 point.

Chief Steward Snelson stated that the people of Poston have faced the rationing program with intelligent fortitude. It was also stated that there is enough rice for Poston and that the rice should not be hoarded as there is plenty for all.

To the disease, the Health Dept. asks the cooperation of the residences in destroying the mosquitoes.

or various places where one departs for employment, many of the Caucasians have never seen a Japanese. To them, Japanese Americans are as newspapers and cartoons picture us and every one of us will be a figure of crypticality and interest.

As first impression is very important, let us all be careful in dressing decently and follow the trend that exists at our new location.
