

HOSPITALITY COMMITTEE ORGANIZED

With increased employment opportunities being opened up by Relocation Supervisor Roger F. Clapp, a group of New England people have established a hospitality committee, the Employment Division stated yesterday.

Drawn from religious, cultural, educational and philanthropic organizations, the members of the committee are anxious to assist those coming into the New England area. Newcomers will be met, short-time hospitality in friendly homes provided, opportunities to meet other Japanese Americans arranged, and permanent housing located.

Meanwhile the committee also intends to work at creating a friendly public attitude. In an area where almost no Japanese have lived before, the prejudices of some other areas are not present and a genuine cordiality may be expected, it was pointed out.

Another hope of the committee is to assist the relocation supervisor in securing more and more desirable employment offers. Reports from the region indicated that the opportunities for interesting and worthwhile work were almost unlimited.

Meanwhile the members of the organizing committee will be glad to carry on correspondence with anyone seeking information about life in New England. The members who may be addressed at 1702 Post Office Building, Boston 9, Mass., are: Mrs. Martha Helen Elliott, Miss Patricia Parmelee, Mrs. Edgar Seeler, Mr. C. C. Beasley, Rev. Francis A. Ricker.

RELOCATION CENTER TO BE USED AS SEGREGATION CAMP

FISHING TO BE CONTROLLED BY BAG AND SIZE LIMITS

Poston's leading outdoor sport among its many residents will be under the strict Arizona State Game and Fish regulations according to the information received here, with the appointing of two game wardens to patrol the fishing areas in each unit.

According to information issued by the commission, the following regulations must be observed relative to fishing limits: bass, bag limit 10 fish, providing total weight does not exceed 15 lbs, legal length 9 inches; channel catfish, bag limit 10 fish, providing total weight does not exceed 15 lbs., legal length 10 inches; all other game fish twenty in the aggregate, not to exceed 20 lbs.; no bag limit on carp and suckers.

It was disclosed that license will be required to take any kind of fish and furthermore fishing will be permitted with hook and line only.

The fishing licenses are expected to go on sale in the next few days, pending upon the appointment of a personnel to issue the license, which will be sold at all three unit canteens.

Fishing for non-game minnows for personal use also requires a license, according to the Arizona Game Laws.

In a statement issued recently by Project Director Wade Head, Mr. Head stated that a relocation center will be set aside as a segregation center for those whose sympathies lie with Japan.

The center to be set aside will not be a punishment center Director Head added. The center at Leupp, Arizona will continue to operate as a punishment center.

In accordance with the Project Director's policy, he is expected to make an announcement regarding these segregation program as soon as complete segregation plans are received from Washington.

FORMS AVAILABLE AT ADMINISTRATOR'S OFFICE FOR M. I. S.

Application forms for Camp Savage are still available in the offices of the unit administrators, it was stated yesterday.

Nisei interested in enlisting in the Military Intelligence School were requested to file their applications as soon as possible, so that their names would be available when the Camp Savage recruiting party arrives in Poston for interviews.

No definite time has been announced to date for the visit of the Savage representatives, but Poston will be notified at least 24 hours before their arrival, it was reported.

SANITATION DEPARTMENT REQUESTS COOPERATION

In view of the mosquito menace prevalent in the three Units, the Department of Sanitation is asking the cooperation of residents in the abatement program by complying with the following requests:

1. No further construction of fish ponds by residents within blocks.
2. All present fish ponds must be kept stocked with fish. Any pond found breeding mosquitoes will be condemned by the Sanitation Department.
3. All sewer-connected ponds must use a minimum of water.
4. All coolers must run with a minimum of water and any resultant water must be ditched into the block area or the surrounding canals. These pools must be oiled weekly.

The biggest sources of our mosquito population are the sewage disposal pools in the three units. These pools must be kept to a minimum in size to facilitate the control measures. If we are to forest all the rationing of water such as practiced in Gillo, it is necessary that the residents cooperate in making use of every drop of water, thereby preventing an increase in size of the sewage pools.
