Dear Doc,

Would it be possible for you to send me
a 6-16 film?

I hope this finds you well - & cooler
than I am. I lie in the sun when
it's 105 and I am sure you would take me
for one of your "Mexican" customers. It is
much easier to walk now and in fact I can
climb low stairs. One thing puzzles me:
since I've gotten so dark - naturally hair
on the skin would show more - but even on my
bree caps the hair has grown so long each
bree looks to be wearing a goatee, and a
foundation cream gums in the fuzz on my
cheeks. Is that a protection which develops
naturally from exposure to sun? Of course I
am more interested in getting well than anything
else but I'm still "vain" enough not to want
to be known as "that hairy woman" after this

is over.

I certainly would appreciate your sending a film - my children came last week and I would like some snaps of them - that is a good reason for wanting the film - at least its an honest one

Thank you

Carol Borrero

P.S. Stamps enclosed.
