Dear Taka:

A very Merry Xmas! Wish I could be in Denver to celebrate with you fellows. We've had a very quiet Xmas. Too much flu around town so we're at home most of the time. Wayne has grown a lot and now weighs 13 lbs. 4oz. at 3 months of age.

What I'm really writing about is about Mother's Arthritis. She has been taking Vitamin D under Dr's prescription. If you read that article in Nov. Reader Digest about Arthritis you know what she is taking. Entron is a trade name of Vitamin D but according to the pharmacist here he has some other Vitamin D of 50,000 U.S.P. units which are as good & not as expensive. Costs \$6.00 per hundred. Would you send me 100 of a similar product? These are green capsules. Mother takes 3 a day & it runs to quite a bit, thought maybe I could save a little thru you. Let me know what they cost & send as soon as you can as she has only 3 day supply left. Also send me at

least one roll of B-2 films. Want to
take some baby pictures & can't get any
films here.

How's the liquor situation? Any better?
Save my share beginning with 1944
& I'll be in some day to get it. Jim I returned
to 1 qt. a week. Rum is awfully good too.
Will send you a check for my old bill
soon. Hope you don't mind waiting.

Please send the 10 Vitamins as soon as
possible & before you forget. They are
50,000 U.S.P. units.

Sincerely,

Also how much is 30 cc. of
Aleurum Percomorphum? also Super
D concentrate & which is better?

Please send 2 largest size Menneus
Baby Oil.
