May 17, 1988

Thank you for inviting me to The
Garden Tour on Saturday May 14th.
It was a perfect weather day and
everybody enjoyed the Tour. I am
happy for the recognition
for your creative work. Your work
is uniquely your own and great how
you combined your love of architecture
Rocks, Water & gardens into a
successful creative business.
Photographs can't show the selection
and shapes of rocks and its relation-
ships to building the whole. Your
plant choices and everything else show
hard work & love of the work.
Dr. Cohen, Dr. Pevsner & Kenneth
Wellner show best your Rocks work.
your architectural work was a
complete surprise. I did not know
you studied with Frank L. Wright.
This Women's News article is very
good and informative. I saw lots
from the whole to the smaller details
and enjoyed every bit of it.

Congratulations Kan! lot
of hard work but worth it. a
beautiful day to remember!

My best
