

JUNE 17, 1944

DEAR SALLY:

Well it seems like its O.K. for awhile. They even complimented me on my drawings. They show up well in blue printing. I sure bear down on the pencil. I didn't ask him how long the work will continue because he was pretty busy. I'll ask him next week though. I got a call from the Arch. League Secy. too but I couldn't get in touch with her today.

Its sure was sultry yesterday. 90% humidity. Today looks pretty warm too. I'm going out to N.J. to look in that direction for something to live in. Going out toward Hackensack, N.J. Bendge says its pretty good out that way. Well, I shall see.

You know I asked Norman Thomas about my clearance (Provoost Marshals'). They had a record of it in the War Dept. but had dropped it when they heard that I had a job here in N.Y. The U.R.A. was the informer. Hell! they don't realize that I just had to have some kind of work, and that if my clearance came through I would probably like to work at the place when they had accepted me. Well! damn it anyhow.

I got up later this morning. It was so warm already that I just went through half of my setting up exercise

2.

I saw Dr. Fogasaki up town when I was visiting the
Tanjo. She seem very well. I'm to call her up
this coming Wed. Dr. Fogasaki is stationed at Bellvue
Hospital.

Jimmie's Radio is swell, Gosh! I really enjoy the stuff.
There are many stations around here. - Day I forgot to
tell you that my pants and raincoat came just in time.
The next day it started to pour. How happy I was to
have it raining. The raincoat is swell. I'm going
to send the trousers to be cleaned & pressed.

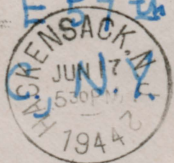

Well, it looks pretty hot here. I guess I'll be
gone nearly the whole day. Well, I'll write later
again. How is the kid? Have you heard
anything further yet from Kiji besides that she
is going to Wisconsin. How's everybody else, Shall
I get the two Tomikawa kid something? what?
I guess I'll stop about here.

Love,
Ken
