

On way home from Oakland

Dear Kan —

I wrote a note to Wak on the way in, you got the return trip time from Shafter on College to Dwight. Not much but maybe I'll be able to finish while eating supper 'cause I don't have to get a real dinner tonight - she's eating out.

I'll say you made me feel sick when you didn't say anything about my coming back & I began to think that if you tho't me wrong, I was really being selfish in returning. Next time I'll know what your policy is but gee if it's real important, please don't keep me guessing, it's hard enough to try to be very adult & think clearly as it is - maybe I should be by now but heck, one sometimes loses all perspectives when thinking about it so much - Well, such is such & here I am and

Not knowing exactly how I stand either. Having tried to study physiol. all summer, that isn't so bad but science in which one sort of memorizes, & writing concise notes from paragraphs is quite another thing. I've sort of forgotten how to take reading notes - to bail down things - never was exceptionally,

10:30 -

Just came back from the library - had to read a book from the new book room - Stone's - how & its Administration started to get sleepy too but find the wall time was just about right & it sort of peaked me up so before the night's over I may even get some washing of personal things mind you) done & since it's the end of the month to check up on what I've spent to date.

It's really quite a nice arrangement here so far anyhow. The days I go for field work I get my own breakfast, wash up & then for dinner, if she feels like eating ahead, she will & I will when I return & then do both our dishes. M, W, F. Am I get her & my breakfast, sweep off the terrace & walk & clean her bathroom - I have a 10 o'clock those mornings so I manage to get everything done by then - I will I should say for Wed I was late - first day I did it & got both of us tired & had to go way over to Highland second floor. The distance after I reach the campus is greater than before - Guess you know from going over to architecture

Josh we had that physical. Ex. Tuesday & I felt swell after it because it was over but I'm wondering if I'll feel as good when I see my paper tomorrow. Josh I've never taken an ex. when the first question just stumped me - not one thing could I think about it. Something about the muscles & the only thing I could think of was how tired my legs were - & in fact still are a little from all the walking - pretty soon my muscles will get use to it, let's hope.

Had also nights the lady goes out, I cook what I want - Saturday clean house - My off - days will vary depending upon her calendar I think, and when I get hungry I eat too - Just had a few grapes & cookies now & my tummy is very large & comfy.

Sally got a readership for the period furniture course today & was quite elated over it because it wasn't expected - It's not the N.Y.A. job either -

She also has that.

Mrs. Radin entered Soc Serv. This time too & she's been pretty nice to me - It was through her I got this place too! We have to read her no-in-law's (Max Radin's) book for June 201 - law & property or something like that - She has the book so I borrow it.

You asked me if I've seen Rindge - they live only a very short distance from here but I've been trying to get settled this week - altho' I don't think I know them well enough to be calling on them tho'. I do know Rindge's wife pretty well -

Gee, Shimi leaves tomorrow for h.f. & then for the last, I had gotten 2 handkerchiefs for him but I couldn't get over last week-end & was going to give it to P.A. (the third boy is on the campus now) but I forgot all about it 'til right now when I realized it is the first of Sept. tomorrow. Guess I'll return them to Pittassa's store & get some ladies' one or something in exchange if she'll let me. I hope so 'cause they're initialed so I won't be able to give them to anyone else. Maybe I'll use them when I go home this week-end some time.

Gee, it's 11 o'clock so I'm going to say goodnight - no laundry either -

Yain
