Dear Sally:

The weather here is just like California. Very nice. Not too hot and not too cold -

Not Sultry. Probably will get warmer & even hot around Sept. & Oct. part.

I went out to Jamaica way & out further on Long Island Tuesday. - It is really rural out there and the houses are small and modern, But it takes just about an hour on the Long Island R.R. to go to a place called Mineola. At Jamaica, which is the end of the subway line on Long Island, there are a lot of buses to take people all different direction. People coming out of the station know just where their buses stop. They all line up in a orderly line. First come, first serve without the pushing & confusion. When the bus comes in they just jam it full. It works out well except that the buses are jammed.

I'm phoning another Real Estate Agent in Yonkers today.

This is another short note just of progress of house hunting. Yuki + Ken haven't found an apartment yet.

I showed the picture of Miki + Ken to some people in the office and immediately the married persons brought out their family pictures. We had a swell time commenting

Yuki just told me Hatsue is working just very near where I am. Probably I've seen her through the office yep, even whistled at her! There are many of them working in dress shop.

Well, now later, trying to collect the signatures now.

Sincerely,  
with Love,

Ken
