TOWSON, MD

7727 YORK RD.

DEAR SALLY:

I heard from Jake this morning after I had sent a telegram to Detroit. He is in N. Y. now. In my telegram to him on the 15th I told him I'm ready any time. He came back with what are my plans. I think I'll tell him to come to Baltimore and we can make plans here. I'm going to show him some markets that they have here. I saw some strawberries, mushrooms, apples, oranges, banana, pineapple, celery, spinach, etc. Florida & Calif. I guess. There are some beautiful large Markets here. Mrs. Simon said it would be all right to put him up here for a night.

I also got my shoe stamps today. I think I will go down town and get your shoes to send to the Camp. I saw another Arch.

yesterday, Lucious White; He has pretty swell too
he wanted to see what I could do. I think a lot of
these architects have capable draftsmen do works
that they do not specialize in. The landscape man
had just hired a girl a couple of days ago. It seems
that he didn't want too experienced a man there. I
saw something pretty good there. It was air brush
work on renderings of plans. It really is a smooth
finish just like printing. Well it was about
5:00 PM. and since I had breakfast around
10:30 AM I went to the library to look around.
I didn't want to come home here while the Simons
were eating. There is a "Enoch Pratt" library
here in this city. Comparable with the library
at Cal. only its divided a little diff. It
sure is a swell library. Oh! yes! did
I tell you that there is a Walter Museum
that I bumped up against while looking for
an Arch. I had a lot of good things like
Corot, Monet, Rousseau, etc. some good
and other not so good. Today (I don't get
up very early) I am writing letters, washing
socks & underwears. This is sure convenient
here. I have breakfast here too. After I
take a bath I'll go down town to get shoes for Mike
and to send them off. I may be able to see
a Frank L. Wright House here. I'm coming
back to finish drafting the house of Mr.
Minomiy. If it comes out good, I'll show
Mr. White.

In the very near future, I will be going down South. I'm sure I can find something. Our first stop will be in Accomack where a farmer wants a share cropper with a good tenure $\frac{2}{3}$ to the farmer $\frac{1}{3}$ to land owner.

There is still snow on the ground and today is pretty cloudy.

The possibility of a job seems fairly likely. Gosh! I've seen quite a few people already. But I may do something on my own yet in Virginia. But somehow I like the proximity of Baltimore, Philadelphia, Wash. there are lots of people here.

When one gets into better climate down Southwards, one gets away from the above vicinity. Ever here I can make a living.

Sometimes or many times I waste time
 seeing a man - have to wait for him
 to come back and all that. I could
 use the phone but it is too impersonal
 but yet I must do that for some of them.

Say, I intended to write more
 but it is two o'clock & I want to
 take a bath and get down town etc.

Love

Kan

How is Miki and KIII
 Does Miki ask for me?
