Wednesday

Jean: Well - mine had my first near-major accident - Kanzo fell & cut himself - just between his eye & eyebrow - I wasn't home at the time & when I got back - his face was covered with dry blood & the floor was spattered in various spots - Miki apparently took him in hand & wiped a lot of the blood up because a towel was all bloody & hanging on the rack (gosh she's wonderful -) Mr. Humamoto happened to come in to see about the cochroaches just after I came in & he said it probably was best to have a doctor look at it so he called the ambulance for me - Jn. Takeyama was on duty - & he took 2 stitches in it - it'd help to prevent too bad a scar. Gee, Kanzo sure cried when the stitches were taken - made me feel real bad - I have to go back in a day or two to have it looked at & on Monday he'll take the stitches out. He's acting as though nothing happened in spite of the bandage - which attracts so much attention its awful - the whole block knows about it & is terribly concerned - more people have come over to ask what happened - From what Miki told me (& she's usually very accurate) he fell & bumped his head on the metal piece on the leg of his crib - I'm sorry this had to happen but I guess it's just the beginning.

Junji just came in - he left yesterday to be inducted - come back tonight a Buck Private - in the reserves.

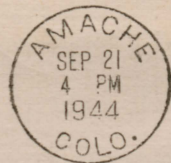

The film came today - so sit the movie pictures.
