

Isezaki Gunma Ken

Nov. 12, 2600

Dear Miss Fujii:

I think you can remember my name. When I put in order my letters in various ways, I found the letter from you, and I suddenly send the letter to you. Please let me write such a something strange letter like this.

I believe you are health and are studying your subject.

Now I want to send the News from Japan. The celebration of 2600th year is holding now, and this is from 10th to 15th of this month.

Every cities are decorated with Japanese flag, some German flags & Italian ones are seen, and with Chōchins (paper lanterns).

Dashies (山車) & Onikoshies (狂言) parade the street. Specially Onikoshi which is held by little children is very lovely & interesting.

You can read the Newspaper on this celebration so many days before this letter and that in detail.

When this letter will be in your hand, Japan will be covered with winter.

If you have anything needing me, I am always for the service to you.

Praying your health & studying.

Yours Sincerely
Taduo Shimozō

Simoneki Isezaki
