Dear Kan.

We received your letter the other day and thank you very much.

Things don't look so hot for any of us now. Most of the single boys that we knew & others has been getting their 1 A cards and a few ready for the physical exams before long. As I look at things now I don't think I should be roaming around for the time being until such time that I may know how I stand. I had in mind about farming some where near a large city in the eastern part of the country. Or on the other hand a job in the radio line, or a radio operators or listening or monitor station man if such a possible position is open to us.

Since the last time I wrote I have gotten another job here. Fixing juke boxes & pin ball machines and some time one arm bandits. hi! Same place as Tak Hishiyama. Pay shall be good from the second month but starting not so good. Hideo is in Salt Lake now, yes selling West Coast Life Ins. again. He seems to be doing pretty good so far.

If anything turns up Kan I'll let you know. I was all set on going east until this damn draft situation came up. You have the right idea about going through with your idea, regard less. But I figure there might be too much investment for me with too little benefit which I expect.

If I am sure that I am called going to be called I'll get a govt cash grant & train fare and I'll see you.

Regards  
Noby

P.S. Just moved into a house so note new address.
