

224 E. Chicago Ave
Naperville, Ill.

Mar 13, 1924

Dear Kan,

Sorry to have taken so long but have been extremely busy. How is the situation out your way? What about the draft?

As for me, I'm 2-A now but am not in subj. since the college had room for a physics deferment, I am now a physics major. The 2-A is subject to review every 6 months until I graduate and then I'm supposed to go into private industry. I'll have to graduate within 24 months also. Am carrying 19 units in Math (plus) Economics, Chem., Desc. Geom., & English.

I saw Jim a few weeks ago. He's expecting to be called as 1-A in the near future.

Haven't heard from anyone in a long time excepting Bob Hiram. He and Fay are now proud father & mother of a baby girl.

The atmosphere here can't be beat. 3 weeks ago, I spoke on evacuation, etc. at a small church about 10 miles from here and was well received.

There isn't much else to say except
that I'm learning how to swim now.

If you have time drop me a line
as to how you're getting along. Hope
you're well situated by now and are
doing something you like.

Ever sincerely
Art
