

Friday March 17th.

Dear Stan,

W. R. A. phoned me this morning and said that Washburn Wire will accept me and also would want as soon as possible, one draftsman, one welder and three electricians.

As my contact with Mr. Jack Richardson of Washburn was more in the preliminary exploratory stage, there were no specific talk of wage scale, and job requirement.

Am going to Providence tomorrow to find housing and see the boss also, or see him on Monday for details.

Would you be able to come here for interview for draftsman job, if it can be arranged?

Generally this firm makes calls

and wire for the Army. The products
are the same as before the war, therefore
its postwar problems of conversion do
not exist. The boss - Jack Richardson
and Ordnance are all for us. The
shop men are 50% OK and 50% "I
don't know." It's up to us to sell
ourselves.

Mr. Clapp contacted a good man
who will help in the housing end -
shall see him tomorrow.

Could you write to me by
special delivery as to whether you can
come and send information I might
need to present to Mr. Richardson?

And it would be tops, if you
know of welders and electricians - Irish
who would get along with Caucasians
well.

Got to do a lot of letter writing now.

Hello to Mr + Mrs. Simons and
Richard and Stevens.

Slick
My job - Asst. Chemist or Metallurgist. - (on your feature that!!!)
