

Tuesday - 1:45-

Dear Ken: You can't imagine what a relief it was to hear from you - golly, you had everyone worried - on Monday (yesterday) before your 2 letters came Yuki Ishimaru was over & I told her about not having a letter from you except from Kansas City & packages from Cincinnati - she encouraged me by telling me all about her cousin who's husband went to work one day & never came back again - Can you imagine! Bob wrote to the Gasahis & told them about your visit so I ~~was~~ felt alright for a while but when nothing came on Saturday - Man, oh, man - I really got scared - but it's all over now - your letters sound awfully good - I'm glad about all the contacts you're making - the people you're staying with sound nice - I know a lot about Japanese Pottery & Wisteria glass - see why - how swell to meet people like that.

Don't write very much because the mail is coming soon - but promise to write a long long letter tonight telling you about everything - should letters go to U.R.A. or to London?

Both kids are over their colds but both have decided to play in the middle of the night so so jolly. how sleepy I am. Kanzo is getting more hair - Mili is more bratty. Oh - I'm going to Denver - had a scrap about it with Yuri who is pretty firm about going but I think I'm going this time - tell you more in time

Dick has been perfectly swell about things - brings in coal, bath water, takes out ashes etc. his okay & I appreciate everything - he got the films yesterday

So please let me know. - I feel the W.R.A. might as well handle the whole thing.

In today's Pioneer News announced that 4 left to work at <sup>the</sup> Sealbrook Farms.

Now about your job - etc.

I think your taking an indefinite leave is okay - especially if its going to help you get a better job.

I think if you can get into some large landscape work - in defense home areas, as you mentioned. it would be very good because very often you may get a break & work into designing not around houses but houses themselves - one thing leads to another - you know that, of course.

About where I prefer - you whiz - honey. I don't know that area at all & feel the choice is wholly dependent on where you land a good job - in addition, of course, to where people are friendly (that's important, because we have kids & contacts with people are greater  $\frac{1}{2}$  esp. when Nelli starts school or nursery school.

she's lolling around would be a lot of help & just a few  
minutes from her but no she really if ever thinks  
of helping me out - especially in the evenings - its  
hard at that time you know - Wah helps me when  
she's home but that's not always - Dick was around  
before but he's no longer available I guess. Oh well,  
I manage to get through every evening without any  
mishap so what's the use of gyping

You got a note from the property dept. about your camera -  
so Dick went down for me & brought back some blanks  
to fill out - now please answer this next time: shall I  
have the W.R.A. handle the whole thing or shall I specify  
how it should be sent & give them some money to pay for  
shipping, insuring etc. You see, you can let the W.R.A.  
send it the way they feel fit & of course, that should  
be good because they're supposed to be very careful  
with stuff now - or you can say you want it  
sent by parcel post, insured for so much, etc. & pay  
the expenses yourself - in each case the W.R.A. does  
the work.

Del write more later but must confess I'm very  
tired now + I can't go much further without  
some sleep.

Take care of yourself —

Lots of love —

Sally

When I ask Mimi where Daddy is she  
points to the doorway + says Bye Bye
