Boston, Mass.

AIR-MAIL

Miss Yuni Domato

6F-5C

Amache, Colorado

53 Union Pk.

Friday 10:30 P.M.

Yuri dearest,

Had an interview at Washburn
this morning.

Richardson said that he could use
me as a chemist's assistance. He was
particularly interested in labor and skilled
workers and engineer draftsmen, electrical
engineers. Said off hand that he could
use about 10 laborers as trial and
about 10 technicians.

Pending the union decision I will
have to wait. I invited myself to
become 'exhibit A' and speak in our
behalf at the meeting.

The outfit is so huge that to go
around the place, I would need to
carry my lunch with me. At one end a
mass of chimney belching smoke from the
open hearth furnace indicated raw metal

being readied for use and at the other
end the finished good was being loaded
on the freight cars and ships. Phew.

I could sure learn a lot if I
were accepted into the company. Gee honey
my luck cannot hold up forever.

The beauty of this district is that
the defense plant requires from the
Nisei no more than they would expect
from the whites. None of these clearance
business that Nan has run into in
Baltimore. I'm almost tempted to
persuade Nan to come here because
prospect seems better and there is
plenty of lodging here where I'm
staying.

Mr. Park, head of U.S.C.S. in Boston
is particularly interested in our situation
and is even present at Nisei gatherings
at the International Institute. With
aid of capable W.R.A. staff, and patience
on our side. I'm reasonable sure that we

shall find the type of work we want.

Honey. I nearly jumped into the frying pan. After looking all over for last week's Life I finally located a copy with a fellow boarder. It seems the after dinner group got curious enough to pry into my business. Darling, how foolish of me to forget the letter, because I read it and felt like I was writing the letter to you personally and felt so proud of it that I wanted the whole world to know about it.

Providence is a nice town. I like it better than Boston as far as the way the downtown streets are laid out. There is a housing shortage because of a tire shop building and defense plants that are going on.

This boarding house is interesting

because the old timers of Boston -
have been here for 20-30 years gather.
They too must be quite refreshed by
the presence of the youths and
exchanging ideas.

See honey. I'm sure missing your
mails but soon I hope they will be
coming in with good news.

Tomorrow, I will go to make my
report with Mr. Clapp then run over
to meet Mr. Pink of U.S.C.S. and talk
with him. If the outlook is bright
I think I shall try to persuade Han
to come out here.

By tonight I found out that: - ^{what} the
vacancies in this house are doing

- 1 fish cutter
2. Warehouseman - coop
- 1 auto mechanic
- 1 silk screen worker
- 1 stenographer - coop
- 1 Unemployed - me
- 1 " " - male

Love - Dick
