Tsubada

There were three things which she pursued and rediscovered during this period of 'hibernation' that have characterized her new form of art:

(1) Self-search to find own identity and own forms;

(2) Research of all the knowns and the possibles by doing and discarding to find the content of reality and to define and reduce everything to the simples and most elemental and then to translate all into own forms and shapes;

(3) Mastery of drawing, color and craft - each to its most simple, direct, alive and beautiful possible usage."

"To me life and art are one of the same," Mine says, "and the foregoing is necessary because one is dealing with highest of intelligence - visual - so none of it is trial or error or guess work."

It took 35 years. Now there is a new generation on the scene.
