

JAPANESE GARDEN

A Japanese Garden is a carefully landscaped area of ground, usually in a park or public place, which is designed to reflect the traditional Japanese garden. It is a place of beauty and tranquility, where the elements of nature are harmoniously blended together. The garden is a reflection of the Japanese aesthetic, which values simplicity, balance, and harmony.

The first Japanese Garden in the United States was created in 1892 in the city of San Francisco. It was a small garden, but it was the first of its kind. Since then, many other Japanese Gardens have been created in various parts of the United States.
