

letter 08

April 9, 1958

Dear Henri:

Hi, thanks for your 3rd letter we received today. Have you received any of ours yet? Will and I want to see Sayanara last night, at last, and thought it was rather interesting sort of stew, a little of everything.

Cash receipts 4/8 - \$ 1,126.70
4/9 - 540.47

Shipments: 4/7 - 664.82 18 orders
4/8 1,308.26 35 orders

The ZLMX came in Monday. We heard from Ichikawa that they are shipping the lighters on Japan Bear which comes in next week. Also heard from Nagata that he is shipping the L-PL-19 and 22 parasol lanterns and the teak and gold trays on same boat, Japan Bear. That's also the boat Kato has Doves, iron wind bells, picks, fly swatters and lotus spoons on.

Enclosing a copy of Jim's P.O. for the DRS-X jackets you ordered. He sent them the original and this copy is for you to keep.

Guess who just came to the store to see you, Warren Watanabe himself with his wife, Mary. He's working for Rome and Haas (shemical co. in Philadelphia. He looks the same. I looked up the place in the Wall St. Jl. and it sells for \$312.00/share! Well, he's here for the Chemists convention and is staying at the Palace. They will be here for about two weeks so we will probably see them again. Too bad you missed him. He seemed very disappointed.

We got the samples from Ichikawa today. Do you thing the little one with legs will be ok? It has such a small head, and they won't be interchangeable with our present ones if they need replacements. The other one with brass at the bottom sounds too expensive. The shape liiks not too bad, but does it have to unscrew at the bottom if the brass is just an ornament? I suppose they ~~mm~~ needed the weight.

Well the weather finally cleared up and we hope it stays. We sure did have a lot of rain since you left. How is it there? Did Tami write about the bamboo hot pad deal? We both think the outer circle should be wooden beads in larger size rather than 1 inch pieces of bamboo as it is on the handbag because it might crack. Be sure to tell your lady fröend that it should be perfectly flat so when a casserole, etc. is placed on it, it won't rock. Also should not scratch the table. We can get several sizes if you succeed to get a good one at low cost.

Jim made up import duty list for you for reference. Tkae good care of yourself. We all miss you.
martha
