TRUMP

Value of useless knowledge -

Fault on if we have to
bring fruit after graduation

- Fallacy: 4 years of college
to give an economic head
start in life

- College not a commodity
Is an experience - not to
teach us how to make dough

Hot comparable to Hot house -
sheltered environment - no serious
problems - Prof's concerned with
our welfare. Subj. to certain influences

- Some can't stand outside life
develop false ideas of life

- Depend on influence brought to
bear

- Depends on our own efforts
Want unit tone not ~~trans~~

ability 2 think independently & articulate
very few Japanese students do that the way
you open mind judgment

Useless knowledge - learn & not
remember 2 remember it all

Goals 2 set up!

1. Social sense - develop ideas
to adjust selves 2 society
2. Our personalities

(1) Develop technical sense - prep.
for grads (good grades) in approach
professors (must be aggressive in society)
also associates

(2) Social sense

(3) Personality - we do have a racial
problem - 1st chance 2 our development

Should learn extravert

Should join groups -
manners - bearing
