

~~Mr. Monahan~~

Mr. Monahan

List of house hold goods

Before loading is started or collecting implements is started,
I wish to have something else done first. It is for a person who
worked at our place. He wishes to have these things sent by
Collect express.

These following things

One very new Singer sewing machine, Covered with cloth of
orange, brown, white, printed material with orange bias for cover.

One Vanity table like in picture except it is a little more simpler
and has no chair. Dark brown, The mirror is covered with a rice
sack cloth.

One Refrigerator, is Norge Co. 6 cubic ft. It is also covered
with a rice sack cloth.

I think they are hard to pack up so if you know some place in
Sangose where there is a storage house Co., let them come and get
the things to pack up and let them send them by Collect Express
under the following name and address -

R. Matsui R. #1 Grand Junction Colorado,

About the expense for the storage Co, I wish you would tell them
to take the express receipt and the other expense bill to Mr. Peckham's
office and tell Mr. Peckham to make a check from my account for
them, to pay the bills, and I wish you will tell Mr. Peckham to
send the paid receipt and express receipt together to my address
please. When you ~~first~~ first visit Mr. Peckham, talk about the storage Co,
and make a clear understanding to Mr. Peckham and I wish you to
talk to the storage Co. about the things please.

Mr. Monahan

List of house hold goods

We left some things in my home, some which are ours and some belong to the boys but I wish to put all of them in the box car except the following things.

(We do not need) Lavenport, tables, chairs, desks, bookcases, books, gas stove, beds, springs, mattresses, all big furnitures

We need all the trunks, wooden boxes, cardboard, or in cloth. etc.

one Singer sewing machine } I hope before you put the frames for the washing
one Washing machine } machine and sewing machine you will wrap them both with cloth sacks or with something else

then put them in the frames so that no parts became broken or scratched. all in my closet things 2 overcoats and all paper boxes things.

If you have any more room I wish to have everything in the tank house top and bottom except empty bottles jugs and such things which are not important left there, but we put in paper boxes or wrapped with paper things which I put numbers on, I wish you to put those things in peacrates or Sengore Cereby distributor crates which we left home, and cover with Cereby bleaching board and load things on box car please

If no empty crates left there I put inside other shed the old roll of Cereby bleaching paper in ~~some~~ crates you can dump them and use ^{them} for that please.

I have some beans-top of tank house room too.

Mr. Marahan

3

We have one more new Vanity and chest (a set) without a chair which belong to some other person who worked at our place, The Vanity is just like the other one which is to be sent by Collect express. So I wish them not to be mixed up please. Probably this other person wants the Vanity and chest sent some other time. In case there is no room to put in the older sewing machine and washing machine in the box car, ~~the same ones~~ I wrote on the house hold goods list, leave them together with the Vanity and chest. The person might want us to send him the things some other time, also there are two kerosene stoves which belong to him.

Mr. Morahan

D2 Caterpillar Put in the Box car.

Overhauled or repaired, I wish to have my D2 repaired or overhauled at, the Kyle Tractor Co, at last if it needs painting have it painted because we have to leave it out side.

If possible I wish to have the D2 repaired or overhauled under the Seed Company's name.

The Time recorder read 2640^{hrs.} when we sent the D2 back from Gridly Calif.,

I wish to have D2 left in the shop until loading begins, then have the D2 loaded directly on the car.

Put the D2 in the easiest position on the car, to start it
Drain out the water from D2, leave some gasoline in the starter engine tank, leave starter engine rope in the tool box. Leave half a tank of diesel fuel in the diesel fuel tank.

Please protect the things on the D2 in the best way you think.

Track roller grease pump, High pressure grease gun, Transmission grease gun, 1/2 qt. oil measure cup, used for filling oil in D2, oil sprayer, (1) penetrating oil cup (copper coated), (1) spring operated oil cup, all the wrenches which are included with D2. one bar fit on the draw bar to pull small implements

(1) D2 power take off pulley (1) endless red belt.

F-12 I wish you to judge for yourself which car to load the F-12 on.

Drain out the water, leave same gasoline in the tank if you think it is not dangerous.

Please be careful some way that the F12 does not roll on the car. When we sent it back from

Gridly it had (4) four wheels two wheels in front (5 ft. apart) Two wheels in back, please move back around 5 ft so easy to unload and so don't take so much room.

One single rubber tire including rim and frame for front. I wish to have the rubber tire wrapped with cloth or sacks to escape scratching. When we hauled the tractor to Gridly Calif, the tire was scratched by the other implements so it blew out, so I wish you to be careful.

One draw bar, one 3 row lister attachment including 3 large ditchers + stands

One bar fit on the draw bar to pull 3 working cultivators.

About the lister's markers holders made of 90° angle steel. one is broken, wish to have Mr. Winsor repair it.

One grease gun handle is little broken.

One wrench for wheel adjustment.

One long wrench like a crank used for attachment.

Mr. Winson

All the tractor cultivators, plow, subsoiler & 3 row lister (John Deere) which have lifting clutches on, I wish to have them tied with rope or with wire so that the clutches do not become released, have the wheels free to roll when unloading.

- (1) Killefer offset discharge 9 ft, 6 in 22 inch beage
- (1) Winsor tractor cultivator with complete stand and 3 V knives, (probably some stands taken off when we sent back from gridly but should be in sacks)
- (1) John Deere plow 2-14 ----- In case some part worn out I wish Mr Winsor to take care of. Including plow shears, we sent back from gridly one pair of new shears. and two pairs good condition.
- (1) Dyr subsoiler
- (1) Showbronize dumping scraper
- (1) John Deere 3 row lister (at Mr. Watrous, Zanker Road. please tell to Mr. Watrous ~~to~~ ^{to} haul to Mr. Winsor's place.
- (1) Tractor Cultivator - spring stands (Used to belong to Ogama's and we sent it back from gridly. some stands taken off and tie to gether.)
- (1) Low Crop Bean Spray rig ----- Including ^{one} 12 nozzles, 4 row outfit stand (!) two row special made 6 nozzle hand spray gun, 3 single nozzle spray guns.
- (2) - two-hundred and fifty feet spray hoses.

We changed the engine to a 8 horse power new engine before evacuation, never used yet. I wish to have the engine separated from the spray rig, make a wooden frame around the engine like when it came from factory and put engine in box car including chain, connect with engine & pump. Hoses, and nozzles in ~~ed~~ car too.

I wish you to judge your self ~~about~~ the spray rig, put on the flat car or box car which ^{over} you think ^{is} best ~~side~~ please, but I think except ^{the} spray rig, other tractor implements in this page best, put on the flat car.

Mr. Mearahan

Ringroller (mashharrow) we have a contract between the seed company and us saying that the seed company can use our ringroller but Mr. Scott very kindly let us use it at Grizzly, Calif, so please talk to Mr. Scott to let us use it again and load it on ^{the} flat car.

Wooden roller special made single horse roller, we will use on top ^{of} onion

If it takes too much room take some parts please.

One John Deere two wheel riding cultivator including stand, clamps, and a pair of discs.

One planted Junior two wheel riding cultivator including stand, clamps, and a pair of discs.

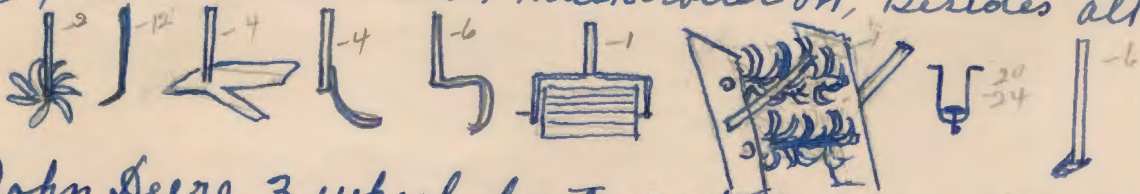

Both cultivators stands, clamps, and discs are put in sacks when sent back from Grizzly.

Each cultivator should have ten stands including clamps.

all stand and clamps are to be put in the box car please.

John Deere four wheel top bed cultivator

used for lettuce, spinach, or onion, I made this specially to set the front part with a spike roller and iron mesh roller on, besides all other original stands like ⁱⁿ picture

John Deere 3 wheel beets and beans cultivator

Including all strong tractor use clamps and stands, this we sent back from Grizzly. Some parts are separated already, at that time ^{they} took too much room to put on ^{the} tracks

550 gal. diesel fuel tank Complete with pump and rubber hose, redwood ^{blocks for} foundations.

I think it would be best to put it on the flat bed car. If it is possible, take the pump, hose, and drain fauset off and put them in the box car. If you think it is very hard to take the pump off or it is safe even without taking it off from the tank I wish you to be careful so that the tank does not scratch any other implements by placing heavy lumber between the tank and the other implement, because it is along distance, so it might move and get scratched and leak from there later, anyhow I think it better to take off the drain fauset so that it is easier to set on the flat car. I wish you ^{to} judge ^{the} ~~it~~ yourself please.

Mr. Marahan

Planted junie one bed seed planter (made by Mr. Winsor)

when we left home Mr. Scott connected it together with company's planter and he used as two bed planter, our seed box has mark scratched on box #1 + #2, any-how I wish you to look inside seeder box propellers, they should have both propellers with the same style. About under sled iron if they ^{are} worn out I wish to have ~~changed~~. We had a steel roller placed in front of the seeders

I wish ^{you would} look at the seeder plow. If they ^{are} worn out please have new ones placed on, including the old ones. Meantime we are going to plant onion and carrots so if Mr. Winsor has a pair of Duck foot plow like Mr. Murphy, is using for planting carrots. Please tell Mr. Winsor to send a pair to us.

If you are going to put the planter on the flat bed car I wish to have the main part of the seeders put in the box car please.

1930 model A Ford sedan (black) I will write to Kassick Garage to look over the car so I wish to have the car put in the box car. We have another Ford sedan 1928 blue which has 5 tires we would like to have the tires with the rims on. Because if we to fit those tires on to the 1930 car we have to have the rims on else they will not fit, Besides we need to put the tires on a mower machine or something else. We took off both cars tires from both cars and put them in side new shed storage room. They were all in good condition.

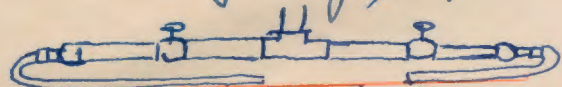

I asked in grand junction freight office and they said it is alright to put ^{the car} it together with household goods, so I wish to ^{have} put in the Box Car some place, way in the corner and carefully take care of the tires. I hope ^{nothing} happens to them like #12 tractor tire when we sent it to Gridley. I will leave it to you so please ^{find} the best way you can. I wish you will take care ^{of} all the glass too, also drain the water please.

I asked around here and grand junction about the price of 1940 or 1941 used car, ^{driven} over 25,000 miles and they said it cost \$1,150⁰⁰ up so I think it would be cheaper to get our car. Meantime I think quite a bit of things (light things) can be put inside of the car and under the car too. I have in my home a Stude Radio, and two sitting clock so I wish you to get some kind of box and put them in side Ford Car please also our Radios are broken and we can not get parts. In the meantime of the front seat for Ford cars is in the New shed somewhere We wish to have it.

mi. mahan

300 gal wooded water supply tank

including $1\frac{1}{4}$ inch pipes with faucet and 2 inch galvanized pipes divided by a T for both sides and ^{a faucet} set to faucet each side of the pipe and set $1\frac{1}{4}$ ^{inch} rubber hoses about 25 ft long. We used at Gridley for planting tomatoes.

I think it best to put the water tank on the box car and the pipes and hoses in the same place. In the mean time you may put some small things like cultivator parts or stands or something else inside of the tank.

John Deere hammer machine

We left an extra screen inside new sheds storage room. I wish to have it with hammer machine

5 horsepower electric motor switch box and wires

Japanese scraper including a 2 wheel trailer to ride on.

Separate the pole and scraper. I think it better to take the handle off too.

Single working cultivators

1 Oliver heavy cultivator

4 McCormick Deering cultivators all exactley of the same type including two quite new ones we barrowed from ayama's at Gridley all the four are good shape.

2 McCormick Deering teeth cultivators (one is ~~brand~~ new never been used.)

1 John Deere teeth cultivator

1 Planted junior cultivator with special stand on.

1 John Deere 10 in. working plow

1 Wooden V not in good shape but we need it. It is used for building up the ^{banks of the} main ditch

Hardy-hand spray pump. 15 gal. new galvanized include red rubber hose,
pressure spray pump. 3 gal, chrome coated include 2 rubber hoses & 2 guns

5 Niagara hand dusters.

2 pumping system are shoulder type dusters.

400 pieces of $1\frac{1}{4}$ in. (18" long) irrigation steel pipes we have about 2000 pieces
and there are two kinds, long and short. I wish to have the short ones and
put on the flat car please.

10 about 40 inches main ditch water shutters, some have holes made
in the center of them. We send back from Gridly.

Small ditch water shutters  we made over 900 pieces but
I am letting Mr. Scott use 200 pieces so we wish to have the rest.
They are 25¢ each and we can't get any now so I wish to have them.

all kind of double, single and some other kind of ties
poles, long & short, in new shed or in Ford truck garage.

One wooden wheelbarrow with side racks.

one all steel wheelbarrow

One all steel pick up truck bed (Ford) left on the south side of new shed.

Extra team hore and single horse lines

2 old manila hemp ropes have been used for hoist (large size)

One ton and a half hoist (chain)

Four (4) steel bars 2 are round 2 are square

Four (4) pieces medium size chains (5 to 6 feet long one side is hook one side is ring)
We use for connect to the implement. We sent them back from Gridley with other small parts in so many Ammonia phosphate sacks. We have here already 3 long chains.

Wooden derrick We have it all separate and send back from Gridley. I think you need to build up a derrick and use the hoist chains and bars, to put some of the implement to put on the truck so after finish using the hoist, chains, and bars. please leave close inside of the Box cars door and about the derrick please take it apart again and put on top of the flat car so that we may take that off first from the flat car set it up first and use to unload from my truck.

Mr. Mowhan
Almost all the things in the new shed storage rooms (Top + bottom) I wish put almost in the car except empty crates shooks and something else not much we need. but we need all small parts (implement) cultivator ditchers, and knives, teeth, plow shears, old hoes, shovels, forks, postholedigger, chainwrench ^{large} for use pipe, baskets, 8 Fire bucket paint outside red, 10 fertilizer buckets paint inside red, corn planter, screen for strain dirt, spray material, cases of oil, scrap iron pile ^{on} the corner of room, other things

These things almost ^{all} we send back from Gridley

One team horse spring harrow.

Two Crab harrows made by Winsor one is all steel made, and the other has a wooden frame.

One barrel of tractor track roller grease (just about $\frac{1}{4}$ left)
One barrel of Standard Oil Co. diesel engine crankcase oil (some left)
One barrel of S.A.E 90 transmission oil (some left)
Two 55 gal original gasoline barrel. (empty)
One empty 15 gal barrel (used for D2 air cleaner oil)

One 5 gal can (use for gasoline or oil for fueling tractor, factory made) and one large funnel with screen in. These things we send back from Greidly.

Very hard to get oil barrels here so I wish to have the oil barrel on the list.

One special made two rubber tires wheel compost spreader (made by Mr. Winsor)
I wish ^{you to} send it to Mr. Winsor's to take everything apart because it will take too much room then load on any car you think best, please.

We have two other manure spreaders, one is John Deere and the other is a special made four wheel compost spreader. We do not need them. Leave in the new shed please

There are some scrap iron on the outside of the Ford garage which we would like to have please put between the implements on the flat car.

In case no oil ^{is} left in the barrels we just need the empty barrels except track roller grease barrel. put on top the flat car please. If there is no room left on the flat car, leave ~~the~~ ^{all} the barrels there.

Mr. Marahan
