FULL USE OF LABOR IS URGED

War production on the Pacific Coast is enormous, but it could be increased immeasurably if full use of manpower, productive facilities and management "know-how" were permitted, the Pacific Coast Chamber of Commerce declared today.

The statement was signed by the following Chamber presidents: Charles F. Clise, Seattle Chamber of Commerce; Preston Hotchkiss, California State Chamber; W. C. Mullendore, Los Angeles; Adrien J. Falk, San Francisco; P. D. Richardson, Oakland; E. G. Griggs 2nd, Tacoma, and David M. B. Simpson, Portland.

"Full employment of these facilities has been prevented by differing interpretations of directives of the Office of War Mobilization and the War Production Board," the statement said.

"Frequently these directives have been construed to mean that Pacific Coast plants should be summarily denied war and civilian work. This has made the manpower situation uncertain, and has resulted in the withholding of important work from smaller plants able and willing to continue in the war effort."

"The West Coast manpower control program, ordered into effect by War Mobilization Director James P. Byrnes, places considerable authority in local production agencies to bring production and manpower requirements into balance."

"These committees should be advised by all government procurement agencies of production requirements, so that they may recommend programming necessary for the most efficient use of available manpower and production facilities in a given area."

HEALTH QUIZ

Do you have poor digestion? YES NO

Do you feel headachy after eating? YES NO

Do you get sour or upset easily? YES NO

Do you feel tired—listless? YES NO

Now everyone knows that to get the good out of the food you eat—must digest it properly. But what most people don't know is that Nature must produce about two pints of the digestive juice—liver bile—each day to help digest your food. If Nature fails, your food may remain undigested, lie sour and heavy within you.

Thus, it is simple to see that one way to aid digestion is to increase the flow of liver bile. Now, Carter's Little Liver Pills start to increase this flow quickly for four to six hours in as little as thirty minutes. When bile flow increases, your digestion may improve. And, soon you're on the road to feeling better—which is what you're after.

Don't depend on artificial aids to counteract indigestion—when Carter's taken as directed, aid digestion after Nature's own order. Get Carter's Little Liver Pills today—only 25c. You'll be glad you did.
