A Navy sailor, Edward Robert Jarina, 28 years old, died in Seattle Naval Hospital yesterday afternoon of injuries he received when struck by an automobile and knocked against a utility pole at 20th Avenue Southwest and West Roxbury Street shortly after midnight yesterday morning.

State patrolmen said Jarina was walking in the middle of the street when struck by an automobile driven by Earl Klempke, 19, of 9004 17th Ave. S. W. Klempke was not held.

## 'WE ARE ALL CAPABLE OF MORE THAN WE DO'

IN THESE CHALLENGING words, the Discoverer and Founder of Christian Science, Mary Baker Eddy, points to a central truth in the teaching of this Science, namely that every individual has capabilities surpassing those of which he has been aware.

Further emphasizing this fact, and indicating also the practical results of its scientific recognition, Mrs. Eddy writes, "Business men and cultured scholars have found that Christian Science enhances their endurance and mental powers, enlarges their perception of character, gives them acuteness and comprehensiveness and an ability to exceed their ordinary capacity."

Countless instances of this kind are on record. Through the understanding of Christian Science, writers have found their skill and usefulness increased, business executives have worked with greater assurance and success, men in the armed forces have been more resourceful, effective, and free from weariness, anxiety, and other distresses than they had thought they could be. And so on in other occupations.

The complete explanation of Christian Science and its method of releasing the latent capabilities of men and women, as well as of healing disease, is given in the Christian Science textbook,
