Will Reduce Price.

By Leased Wire. CHICAGO,/Saturday, July 6.—A depart-CHICAGO, Saturday, July 6.—A departure in intra-mural freight handling which is of interest to shippers is about to be made here. The plan calls for the construction of a big warehouse and dock, land for which has already been purchased at State and Water streets, and a system of lighters to run on the river. As the majority of the railroads centering here have dockage facilities and the river is lined with factories, much of the freight transfer business now handled by express companies is expected to be obtained. It is expected the cost of transferring freight from one railroad to another and from the railroads to the lake steamers or vice versa will be much reduced.
