**MAGNESIA FINE
FOR DYSPEPTICS**Neutralize Dangerous Stomach
Acids Which Cause
Indigestion.

The almost universal use of Magnesia by physicians and stomach specialists is due to the fact that it instantly neutralizes the dangerous stomach acids which cause nearly all digestive stomach trouble. With acid gases and stomachic secretions, and indigestion, it is a most effective remedy. A glass of hot Magnesia water after meals prevents all trouble.

Old dyspeptics, whom indigestion and sour, weak and sickly stomachs have made miserable for years, find quick and lasting relief in this simple remedy, and are again able to eat what they please. A glass of hot Magnesia water after meals prevents all trouble.

Prepare Magnesia water at home by dropping one teaspoonful or four tablets of pure Bismarck Magnesia in a glass of hot water. Any reliable druggist can sell you the genuine Bismarck Magnesia and stomachic medicines will soon find that the stomach, relieved of irritating acid and gas, soon returns to normal tone, and will do its work alone without the aid of artificial digestion.

**Adler-i-ka
Again!**

"I was bothered with gas on the stomach, belching and general stomach trouble. The first bottle of Adler-i-ka gave relief, and 2nd bottle CURED me. I feel fine now."

(Signed) George Kosak.

Adler-i-ka acts on BOTH upper and lower bowel, removing foul matter which causes gas. Brings out all gases, relieving pressure on heart and other organs. EXCELLENT for gas on the stomach or sour stomach. Removes a surprising amount of foul, decaying matter which you never thought was in your system and which nothing else could dislodge. Tends to CURE constipation and prevent appendicitis. Adler-i-ka surprises those who have used only ordinary bowel and stomach medicines. Swift Drug Co. and Bartell Drug Stores.—(Advertisement.)

**Naturalization of
Japanese Held Up**

WASHINGTON, Thursday, Sept. 30.—A second postponement of arguments in proceedings involving the right of the Japanese to become citizens of the United States will be asked of the Supreme Court when it reconvenes Monday, it was announced by Solicitor-General Clegg.

The case at issue resulted from the denial of citizenship in Hawaii to Takao Ozawa, a Japanese, and was filed in the Supreme Court in 1917. Arguments were deferred last term at the request of the government for diplomatic reasons.

The solicitor-general said the second postponement would be at the request of George W. Wickersham, former attorney-general and counsel for Ozawa.

Friday Is the Day!

A slight mention of "Dollar Friday" these times when you can scarcely buy a velvet band alone for a dollar, should and will attract hundreds of eager buyers of these exceptional trimmed and banded Hats which we have scoured the markets to sell at this price.

Hundreds and hundreds to select from. Nothing to compare with them at three times the price at any other store in the West.

WANT GROUNDS IMPROVED

YOUNGSTOWN? Oh, yes, that's the place over in the southwest part of town where the steel mill is. Wrong, decidedly wrong. Youngstown has the biggest steel mill in this part of the country and is proud of it, but that isn't Youngstown. It's only an incident in the community.

The real Youngstown of today is a place where school and community meet on common ground; where the public school is one of the biggest factors in community life; where the fine professional spirit of the teachers reaches out beyond the school-room walls and touches the homes where these new to this country and its institutions are learning the ways of Americans, and where the school has come to be the center of the community life instead of merely a place where the children spend a few hours every day.

All this was brought out at the Youngstown school and community garden exhibit in one of the assembly rooms of the school yesterday afternoon and last night. Those who visited the exhibit noted several striking features. One was the arrangement of the exhibit, with every article displayed to the best advantage. Another was a display of 72 varieties of seeds, herbs and plants by Henry Shrive, 15 years old, 2501 Sixth Ave. S. W., and one that was the pumpkin, weighing more than 50 pounds, grown by 9-year-old Ruby Landon, 447 26th Ave. S. W. Combined with these and other entries by the pupils was a display of products grown by the parents, grouped in a community exhibit. Another feature was a big display of canned fruit and vegetables by the girls of the domestic science classes. Besides all the special features there was a general display of vegetables, fruits and flowers that, in the opinion of the members of the Seattle Horticultural Association, who visited the school, would be worthy a place in any exhibit.

Friend of Exhibit.

"We are proud of this exhibit as a whole because it is an evidence of thrift, but we are particularly proud of the community spirit which it shows," said Principal Aaron Newell. "One of the big things about Youngstown school is the support of the community. We are trying to make the school the center of community activity and the people are helping us with us and the people appreciate it. We were fortunate to have been on the building list before the board was organized to carry out the construction program, and this fine exhibit was the first of the permanent structures built."

Youngstown is an industrial center, and such is the advantage of complete courses in manual training and domestic arts. In the manual training department, under the direction of Charles L. Simmons, 150 boys are learning the use of tools and applying their knowledge in the making of useful articles for the home. Grouped in one of the advanced classes are now making a heavy board for their mothers. In the domestic science department, in charge of Miss Beatrice Carpenter, a University of Washington graduate, groups of girls from the home art classes are becoming proficient in cooking, sewing and other domestic arts. This department is one of the show places of the school.

In connection with the domestic science department, Youngstown school operates a lunch room where 25 to 100 children are served every day. Eight girls from the domestic science classes do the serving and the money and donations in the bank every day. Prices are based on cost and the income has been sufficient to cover the expenses. Products of the school gardens and the home art classes are sold at a price that covers cost of production.

Because of the cosmopolitan character of the community many nationalities are represented in the Youngstown school. In the kindergarten and first grade classes there are ten children unable to speak a word of English. Two of these arrived in this country only a few days ago and they are getting their first lessons in American ways and customs.

One of the Youngstown primary rooms has been equipped with a set of the furniture manufactured this last summer by the boys of the Youngstown school. In the kindergarten and first grade classes under the direction of the department of building maintenance, teachers and pupils are delighted with the change from the stationary desks to the movable tables and chairs which give the children greater freedom and reduce restlessness.

Has Two Orchestras.

Another feature in the Youngstown school which appeals to the community is the work in music. The school has two orchestras of 15 pieces each. They meet for instruction twice a week and play for the school and community entertainments.

Besides the good things already mentioned, Youngstown enjoys all the features that are found in the other modern schools in Seattle. People over the hill think they have a fine lot of teachers who see an opportunity beyond the mere teaching of the children. Principal Newell heartily concurs in the saying a fine group of teachers have been brought together in the community, and in that he includes Mrs. Leah Griffin, garden supervisor, who divides her time between Youngstown and the other schools in that district.

Youngstown people are finding in their school a big help in all community movements. They appreciate the extent to which the school plant has been made available for community service and are hoping that it will come into a still wider use. They are also hoping that the Seattle Park Board will be able soon to follow the example of the school board in providing facilities for community service. They are hoping that the 12-acre park property directly in front of the school, part of which is covered with brush, will be improved in the near future, at least to the extent of clearing the brush and draining off the surface water.

Today Youngstown is packing up its display of home-grown and school products and sending them to the Hinawatha Playfield house, West Seattle, to take part with other schools of that district in the big exhibit which opens tomorrow morning at 10 o'clock.

**5,000 STUDENTS REGISTER AT
UNIVERSITY OF WASHINGTON**

Five thousand students had registered at the University of Washington yesterday afternoon at 5 o'clock when the registrar's office closed. With four more days in which to register, the registrar's office closed. With four more days in which to register, the registrar's office closed.

Business administration proved to be the most popular college, having a record enrollment of 1,510. Last

year's total enrollment in this college was 1,323 for the fall quarter.

Liberal arts college comes second, with an approximate enrollment of 1,085, which is about the same as last year. The graduate school showed an appreciable increase in enrollment. Half of the graduates are from the University of Washington, taking special work towards higher degrees. Among them there are eight candidates for the Ph. D. degree.

**PRESIDENT SUZZALLO WILL
ADDRESS FRESHMEN TOMORROW**

President Henry Suzzallo of the University of Washington will deliver his annual address to the incoming freshman class in Meany Hall tomorrow morning at 10 o'clock. Some students and a short program, arranged by the Knights of the University of Washington, will precede the address.

Freshman traditions will be observed during the first assembly on account of the large seating capacity. It is a university tradition that freshmen must sit on the balcony or gallery. Owing to the fact that the assembly is held primarily for the benefit of freshmen, freshmen will be permitted to sit downstairs and the sophomores have been asked to give places to them. The capacity of Meany Hall is about 2,300, while there are more than 5,000 students registered.

**GARY PUTS FRENCH
INDUSTRY ON FEET**

American Capitalist Agrees
to Finance Rehabilitation
of Steel Works.

By Universal Service.
LONDON, Thursday, Sept. 30.—American financiers are now in a fair way of settling France on her industrial feet, according to information obtained in American business circles.

The United States Steel corporation, through Judge E. H. Gary, has agreed to finance the rehabilitation of the French steel industry, and it is said that Judge Gary, when he returns to France, will be furnished France to replace that formerly obtained from the mines in Alsace-Lorraine which were destroyed during the war and are unproductive.

**Doctor Tells How to
Strengthen Eyesight**

By the simple use of Bon-Opto, says Dr. Lewis. I have seen eyesight strengthened 50% in a week's time in many instances, and quick relief brought to inflamed, aching, itching, burning, work-strained, watery eyes. Read the doctor's full statement soon to appear in this paper. Bon-Opto is sold and recommended everywhere by Druggists.

**Tractor Will Supplant Dogs
To Aid Alaska Mail Service**

Caterpillar Will Be Used to Break Trail and If
Necessary Haul Load to Fairbanks
From Anchorage.

Special to The Times.
ANCHORAGE, Alaska, Thursday, Sept. 30.—For the first time in the history of Alaska, a tractor will supplant dogs in winter mail service, or at least precede dogs and break the trail when snow-drifts threaten to delay the United States mails inland.

Mail transportation previous to this year has been reckoned in dogs, and now that the mail service is being extended to Fairbanks, the Tanana River, Yukon, St. Michael, Nome and other far distant points, a tractor will be used to haul mail loads through snow-drifts where horses and sleds have broken through and had to be provided with an igloo until the snow melted and permitted taking them out.

To handle 2,400 pounds of mail will require three dog teams of 15 dogs each. To accommodate winter travel and carry parcel post, mail must be doubled this number. This means that the engineering commission will be compelled to maintain at least 100 dogs or more.

The Tanana-Nenana route is one of the most difficult in Alaska, owing to the heavy fall of wet snow under the influence of the Japanese current that swings up Cook Inlet and sweeps inland along the range of mountains and through the broad pass country. But for three feet in one night are not infrequent and this means doubling up the dogs to provide breakers in front of the pullers.

The big tractor will be kept at the end of steel and ready to crawl forth in the event of heavy travel, and in case dog teams are held up the tractor will supplant that mode of transportation entirely. But for the fact that the tractor will be required to keep supplies out in front of construction, it would be used exclusively on the mail service.

Conditions like these are some of the problems that face the Alaska Engineering Commission almost every day and gives some idea of the difficulties under which the crews work in completing the government railroad to Fairbanks.

The Mexican government is planning to establish 30 new radio stations in the near future.

**See How We Make
These Famous Snow Flakes**

Visit our big modern bakeries where millions of Snow Flakes are made every day. See the epic and span interior. Note the wonderful mixing machines and the huge brick ovens. After you've seen them baked you'll know why they're so good. Your grocer can supply you.

Prisoners Lose Strike.

BISMARCK, N. D., Thursday, Sept. 30.—Forty-eight of the 127 inmates of the North Dakota penitentiary here, who refused to work to go to their cells have been placed on a bread and water diet and the "strike" has been broken. It was announced yesterday. The strike, it was declared, came after unsuccessful attempts to form "societies" among the prisoners. There was no violence.
