PROMISES GALORE

By DAVID LAWRENCE. WASHINGTON, Tuesday, Oct. 30 .- Within a week there'll be a congressional election. Its outcome will not affect the Democratic or the Republican Party, as such, materially either way. The Democrats now have a substantial majority in both houses of Congress. The Democrats will retain

that majority.

What is of great importance, however, is what kind of Democrats and what kind of Republicans will be elected. Hardly ever in the memory of the oldest political observers has there been a congressional election in which this aspect has been of such profound significance.

If more radicals are elected, President Roosevelt himself may be embarrassed, for the time may come when, irrespective of party labels, Mr. Roosevelt will want all those who agree with sound economic plans to line up with him and for those who want unsound proposals adopted to line up against him, so that the country may know the diferrence.

THE men elected to Congress next week will take office next January. What they promise in Lester, 21, confessed that they blastthe campaign now they will be ed the safe at the Stewart Lumber inclined to vote for in the winter & Hardware Company, 1761 Rainier session.

service.

THE Republicans on the stump are saying they will accord Mr. Roosevelt support on relief policies that are sound but will vote against him when the people feel he is pursuing wrong policies.

The Democrats are pledging 100 per cent support, and it is on this ground that Republicans are asking for votes-they declare that it is better to elect independentminded members of Congress than those who will surrender the legislative power to the executive

branch of the government. Curiously enough, the radicalism that may crop up in Congress will find stanch opponents from the Democrats in the South. There once was a time in the North when political capital was made out of the prospect that southern congressmen would dominate congressional committees. The northern conservatives, however, may now look forward with some degree of comfort to these same southern conservatives.

It is true that conservatives and radicals alike from the South, with some few exceptions like Senators Byrd and Glass of Virginia or Gore of Oklahoma, have seemed to be rubber stamps for White House desires, but this is a strategy which may turn out in the end to be helpful to those same southern Democrats when they find themselves aligned against radical tendencies.

The chances are that Mr. things at the toy association re-consevelt will find in the infla-Roosevelt will find in the inflation controversies and in the matter of balancing the budget that he will have to rely on southern conservatives to lead the fight.

To the slim blond waitress who ook Fritz Kreisler's order for bacon and eggs this morning, the world's greatest violinist was just a wee oit disappointing.
