SKELETON:

REMAINS BELIEVED TO BE THOSE OF INDIAN

Probability that the age of skeleton which was found under Barrack 5111 may be anywhere from one to ten years old was expressed by Harold S. Jacoby, chief of internal security.

He estimated the height to be about five foot nine inches.

Four teeth in good condition were still embedded in the jawbone.

The number of bones indicated that two skeletons may have been found.

Belief was held that the skeleton may be that of an Indian.

They will be reconstructed to determine sex, age, and for other pertinent information. Possibility of any foul play was held unlikely.

However, medical authorities have been called into the case.

Block 51 has already been named "Skeleton Block" and a sign to that effect is tacked on a post.
