Order Of Merit

MERIT BOARD COMMITTEE

The guiding light behind the merit system which was established on September 14, 1942 in accordance with Administrative Instruction No. 27, in this project is the members of the Merit Board Committee, who are as follows: Joe Hayes, chairman, and Paul Fleming, Frank Fagan, Harry Mayeda, Ted Nakamura, Shigeichi Kubo and John Fukuyama.

Present officers of the Merit Board are: executive secretaries, Shigeichi Kubo and John Fukuyama; and secretary Kiyo Aiura.

PROJECT DIRECTOR COVERLEY COMMENDS MERIT WINNERS

Project Director Harvey M. Coverley's letter of commendation, given individually to 395 members of the Order of Merit of the Tule Lake Project, contained the following passages:

..."You have been chosen as a member of the Order of Merit...established in special recognition of those evacuee workers whose service were especially outstanding."

..."It gives me great pleasure to congratulate you and to express my sincere appreciation for the devotion and energy you have so generously displayed in your work."

..."I hope that later on and upon relocation it will be of assistance to you in achieving your goal in life."

PROCEDURE GIVEN FOR SELECTION

Candidates for the Order of Merit were selected by the Merit Board after careful analysis of the amassed points of workers in two performance reports, that of September-October and of November-December, it was disclosed in a report by John Fukuyama, one of the two executive secretaries of the Board.

Workers to be awarded the Order are to be picked every three months. The next group is expected to be announced soon.

The following was the system used in selecting the candidates:

1. The number of workers in each project division was determined and a performance report was filled out for each person, checking upon it the degree of skill, resourcefulness, initiative displayed, cooperation with others, etc.

2. From each division, the percentage to qualify was decided--this ranged from five to seven per cent, depending on the type of work.

3. Ratings were made of the performance reports of each worker, and these were averaged according to divisions.

4. The designated percentage of workers in each department with the highest ratings were selected for the Order of Merit.

5. A recheck of the selected individuals was made with the supervisor or head of the respective department. Individual character references were also obtained through private sources.

Some sections did not turn in their performance reports, depriving their employees of any representation in the Order, it was explained.

John Fukuyama expressed satisfaction with the results and appreciate the cooperation given.

"We hope that this Order will benefit these people who received them in relocating or while on the Project," he stated.
